Positioning Analysis Fathali M. Moghaddam, Rom Harré, Naomi Lee, 2007-11-15 Positioning theory is the study of the nature formation influence and ways of change of local systems of rights and duties as shared assumptions about them influence small scale interactions Evolving from linguistics origins the theory concerns conventions of speech and action that are labile contestable and ephemeral With this theory researchers are able to examine the dynamic flow of social interaction as well as give equal weight to the role of discourse and the psychological resolution of conflict This volume applies positioning theory in order to achieve a fuller and more in depth understanding of conflict and its psychological resolution The editors approach positioning from the micro interpersonal level all the way to the macro intergroup and international level

Democratization and Social Movements in South Korea Sun-Chul Kim, 2016-01-29 South Korea provides an intellectual challenge in the fields of social movements and democracy in that intense mobilization and the strong influence of social movements have accompanied steady democratization for more than two decades despite major theories having predicted otherwise This book examines how social movements in previously authoritarian contexts evolve after democratic transition using South Korea as a case study It explores how democratic change influences the form of social movements and how social movements affect the pace and direction of democracy in turn It explains how South Korean social movements were able to attain strong political influence by focusing on four causal factors the configuration of major political actors during the transition period the relational dynamics among social movement groups the relationship between social movements and institutionalized political actors and the impact of transnational forces in the post transition period Unlike

previous scholarship the book takes a historical actor centered and process oriented approach that closely follows the interactions among contending actors through event sequences rather than being driven by abstract theoretical frameworks In doing so it analyses uses a broad range of evidence including police records untapped activist documents presidential memoirs newspaper accounts and original data sets Shedding light on the complex political reality that gave rise to a contentious civil society in South Korea after democratization this book also illuminates the institutional conditions that can help promote domestic peace and stability Therefore it will be of great use to students and scholars of Korean Studies Korean politics and social movements as well as policy makers Rethinking the Occupy Movement in Hong Kong Shen

Yang,2024-07-25 Yang examines the political process of the Occupy Movement spanning from January 2013 when the Occupy Central with Love and Peace OCLP campaign was initiated to December 2014 when the Occupy Movement finally ended This book adopts an actor centered approach in the study of democratization and places civil society as the focus of the analysis The OCLP campaign was an attempt to transfer leadership of democratization from political parties to civil society while the incorporation of Deliberation Days further let ordinary participants decide on the electoral proposals The democratic ideals of civil society activists and the mobilization of radical democrats led the campaign to enter a radical position The Chinese government interpreted democratization in Hong Kong from a regime security perspective and took a hardliner position After the Occupy Movement finally occurred the leadership of civil society and the conception of civil disobedience contained the radical protesters However after the movement civil society organizations were blamed for its failure and contention in Hong Kong became more transgressive and decentralized This book is a valuable resource for scholars of Hong Kong s Politics and a relevant case study for those studying the dynamics of social movements and the civil society strategy in democratic transition *East Asian Social Movements* Jeffrey Broadbent,Vicky Brockman,2011-01-07 In the study of civil society and

social movements most cases are based in Western Europe and North America These two areas of the world have similar histories and political ideals and structures in common which in turn affect the structure of its civil society In studying civil society in Asia a different understanding of history politics and society is needed The region s long traditions of centralized authoritarian states buttressed by Confucian and in some cases Communist ideologies may render this concept irrelevant The chapters in this international volume cover most of the areas and countries traditionally defined as belonging to East Asia Japan Taiwan South Korea Hong Kong Singapore and China The case studies included in this volume confront the utility of using the Western concept of civil society represented in its most active form social movements to think about East Asia popular politics Along with providing an array of important case studies of social movements in East Asia the introduction chapters and conclusion in the book take up three major theoretical questions the effect of the East Asian cultural social and institutional context upon the mobilization activities and outcomes of social movements in that region the role of social movements in larger transformative processes utility of Western social movement concepts in explaining social movements in
