Les Représentations Sociales Cursus:

Les représentations sociales Denise Jodelet, 1997 (Oxford) **The Oxford Handbook of Social Relations in the Roman World** Michael Peachin, 2011 The study of Roman society and social relations blossomed in the 1970s By now we possess a very large literature on the individuals and groups that constituted the Roman community and the various ways in which members of that community interacted There simply is however no overview that takes into account the multifarious progress that has been made in the past thirty odd years The purpose of this handbook is twofold On the one hand it synthesizes what has heretofore been accomplished in this field On the other hand it attempts to configure the examination of Roman social relations in some new ways and thereby indicates directions in which the discipline might now proceed The book opens with a substantial general introduction that portrays the current state of the field indicates some avenues for further study and provides the background necessary for the following chapters It lays out what is now known about the historical development of Roman society and the essential structures of that community In a second introductory article Clifford Ando explains the chronological parameters of the handbook The main body of the book is divided into the following six sections 1 Mechanisms of Socialization primary education rhetorical education family law 2 Mechanisms of Communication and Interaction 3 Communal Contexts for Social Interaction 4 Modes of Interpersonal Relations friendship patronage hospitality dining funerals benefactions honor 5 Societies Within the Roman Community collegia cults Judaism Christianity the army and 6 Marginalized Persons slaves women children prostitutes actors and gladiators bandits The result is a unique up to date and comprehensive survey of ancient Roman society **World Guide to Libraries** Helga Lengenfelder, 1987 Paul and the Ancient Celebrity Circuit James R. Harrison, 2019-11-18 In this study James R Harrison compares the modern cult of celebrity to the quest for glory in late republican and early imperial society He shows how Paul's ethic of humility based upon the crucified Christ stands out in a world obsessed with mutual comparison boasting and self sufficiency **Connexions; psychosociologie, sciences humaines**, 2005 **Vision, Devotion, and Self-Representation in Late Medieval Art** Alexa Sand, 2014-03-31 Focuses on one of the most attractive features of late medieval manuscript illumination the portrait of the book owner at prayer within the pages of her prayer book *Recueil des résumés de communications*, 1989 Finding the Limits of the Limes Philip Verhagen, Jamie Joyce, Mark R. Groenhuijzen, 2019-02-08 This open access book demonstrates the application of simulation modelling and network analysis techniques in the field of Roman studies It summarizes and discusses the results of a 5 year research project carried out by the editors that aimed to apply spatial dynamical modelling to reconstruct and understand the socio economic development of the Dutch part of the Roman frontier limes zone in particular the agrarian economy and the related development of settlement patterns and transport networks in the area The project papers are accompanied by invited

chapters presenting case studies and reflections from other parts of the Roman Empire focusing on the themes of subsistence economy demography transport and mobility and socio economic networks in the Roman period The book shows the added value of state of the art computer modelling techniques and bridges computational and conventional approaches Topics that will be of particular interest to archaeologists are the question of forced surplus production the demographic and economic effects of the Roman occupation on the local population and the structuring of transport networks and settlement patterns For modellers issues of sensitivity analysis and validation of modelling results are specifically addressed This book will appeal to students and researchers working in the computational humanities and social sciences in particular archaeology and ancient history

Subtle Bodies Glenn Peers,2001-02-14 Throughout the course of Byzantine history Christian doctrine taught that angels have a powerful place in cosmology It also taught that angels were immaterial bodiless invisible beings But if that were the case how could they be visualized and depicted in icons and other works of art This book describes the strategies used by Byzantine artists to represent the incorporeal forms of angels and the rationalizations in defense of their representations mustered by theologians in the face of iconoclastic opposition Glenn Peers demonstrates that these problems of representation provide a unique window on Late Antique thought in general
