

Please read all the instructions before starting work on your project.

The risk assessment project is broken down into a number of stages, which should flow from start to finish, telling a complete story of your **work area** and the **hazards, risks and their required controls** within it.

Please use the risk assessment template below for this process.

**For this risk assessment project, it is important that you only choose hazards that are not currently adequately controlled.**

Your risk assessment **must** show the following about your work area:

- o Details of the work area being assessed; o The tasks being performed in the work area;
- o A listing of four (4) hazards in the work area, with each one followed through the risk assessment process;
- o List who may be harmed by the hazard; o State how they may be harmed; o Describe the risk controls already in place o Calculate a risk rating -- using the IOSH 5 x 5 matrix; o Describe any additional controls needed;
- o Calculate a risk rating for the new controls (the residual risk); o State who will action or monitor any further controls; o State when the actions or monitoring needs to take place.

**In addition** it must also show the following basic information:

- o Your name;
- o Date and time of the risk assessment; o Your training provider's name; o Your signature; o The risk assessment review date.

## Malpractice

What you must not do (Plagiarism, cheating, etc.)

Any work that the tutoring team believe to be copied from other materials and not the students own work/words will be investigated as malpractice.

If the malpractice is found to be correct the student's exam/project will be voided and the student will lose one of their two attempts at the exam/project.
