The book explores the impact of physical and psychological experiences during childbirth on the well being of both mother and baby providing insights into the complex interplay between the mother's body and mind and the infant's behaviour and development. It is a vital resource for midwives and other healthcare professionals who work with mothers and infants during childbirth. The book presents three original in-depth studies situating these findings within the broader context of existing research. In doing so it offers a nuanced perspective on childbirth as not only a medical event but also a profoundly human experience with lasting consequences for both mother and child. By the end, readers will have a deeper understanding and greater compassion for childbirth as a holistic transformative and life-changing experience, one that shapes the foundations of the mother-baby bond and helps determine the infant's early development.
