silver as by fusion the white powder they obtained by precipitation was converted into a horn like substance They Observed that this horn silver was blackened by light and as they taught that silver only differed from gold in being mercury interpenetrated by the sulphureous principle of the sun s rays they concluded that this change was the commencement of the process by which their dreams were to be realized Failing however to produce gold from horn silver the fact of its blackening was simply recorded and no further investigations were made into this remarkable phenomenon Petit in 1722 noticed that solutions of nitrate Of potash and muriate of ammonia crystallized more readily in the light than they did in darkness About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at [www.forgottenbooks.com](http://www.forgottenbooks.com) This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works

As the students become more involved with Morrow, they begin to commit increasingly dangerous acts. The Secret History is a brilliant and suspenseful novel that will keep you guessing until the very end. The novel is a cautionary tale about the dangers of obsession and the power of evil.
