Manual On Water Supply Treatment Kolkata:

Challenges of Urbanization in the 21st Century Kalpana Markandey, B. Srinagesh, Ashok Kumar Lonavath, 2013-01-01

This series on Challenges of Urbanization in the 21st Century is a five volume compendium that contains the articles presented at the 11th Asian Urbanization Conference held at Hyderabad India in collaboration with the US based Asian Urban Research Association. The First Volume Amenities and Facilities in Urban areas deals with the presence or a lack of Amenities and Facilities in Urban Areas across a cross section of space Infrastructure educational facilities transport and traffic modelling designing and redesigning of these facilities and amenities form the core of this book. The micro and macro spatial scales rural urban contrasts and Divides in access are also highlighted.

Contaminants of Emerging Concerns and Reigning Removal Technologies Manish Kumar, Sanjeeb Mohapatra, Kishor Acharya, 2022-06-30 With an increased demand for wastewater reuse groundwater recharge with treated wastewater has been practiced across the globe. As a result groundwater quality deteriorates by emerging micropollutants from various anthropogenic origins including untreated wastewater seepage of landfill leachate and runoff from agricultural lands. The fate of such emerging and geogenic contaminants in subsurface systems especially in the groundwater depends on several factors. Physicochemical properties of contaminants such as octanol water partition coefficient dissociation constant water solubility susceptibility to biodegradation under anaerobic conditions and environmental persistence under diverse geological and pH conditions play a critical role during subsurface mass flow. Thus advanced wastewater treatment techniques followed by implementing stricter guidelines are some of the measures that can safeguard water resources. This book in general gives an understanding of the fate and mitigation strategies for emerging and geogenic contaminants in the groundwater. The first and second sections provide a detailed insight into various removal techniques and mitigation approaches. Possible treatment strategies including bioremediation and natural attenuation are also covered in those sections. Environmental assessment groundwater vulnerability health effects and regulations pertaining to various contaminants are systematically presented in the third section.

Urban Disasters and Resilience in Asia Rajib Shaw, Atta-ur-Rahman, Akhilesh Surjan, Gulsan Ara Parvin, 2016-01-06 Urban Disasters and Resilience in Asia presents the latest information on the intensity and frequency of disasters. Specifically the fact that in urban areas more than 50% of the world's population is living on just 2% of the land surface with most of these cities located in Asia and developing countries that have high vulnerability and intensification. The book offers an in depth and multidisciplinary approach to reducing the impact of disasters by examining specific evidence from events in these areas that can be used to develop best practices and increase urban resilience worldwide. As urban resilience is largely a function of resilient and resourceful citizens building cities which are more resilient internally and externally can lead to more productive economic returns. In an era of rapid urbanization and increasing disaster risks and vulnerabilities in Asian cities Urban Disasters and Resilience in Asia is an invaluable tool for policy makers researchers and

practitioners working in both public and private sectors Explores a broad range of aspects of disaster and urban resiliency including environmental economic architectural and engineering factors Bridges the gap between urban resilience and rural areas and community building Provides evidence based data that can lead to improved disaster resiliency in urban Asia Focuses on Asian cities some of the most densely populated areas on the planet where disasters are particularly devastating
