Chapters in this book cover need to know information about nutritional science with direct application to the nursing process. This book provides a comprehensive overview of nutritional principles and delves into building block elements: macronutrients and micronutrients and basics of nutritional biochemistry to provide the reader with a clear concise explanation of nutritional principles. Individual chapters focus on developmental areas of nutrition across the lifespan, nutritional therapeutics, nutritional support and therapeutic diets and nutritional supplements. The last chapter examines the nutritional management of clients who experience multisystem disorders. This book is intended for use as one resource in managing a client's nutritional status and should be used in conjunction with appropriate referrals and collaboration with registered dietitians to provide client care and determine specific nutritional outcomes.
