Something Michael Brownstein,Alex Madva,Daniel Kelly,2025-09-16 A novel and scientific approach to creating
transformative social change and the surprising ways that each of us can help make a real difference Changing the world is
difficult One reason is that the most important problems like climate change racism and poverty are structural They emerge
from our collective practices laws economies history culture norms and built environments The dilemma is that there is no
way to make structural change without individual people making different more structure facing decisions In Somebody
Should Do Something Michael Brownstein Alex Madva and Daniel Kelly show us how we can connect our personal choices to
structural change and why individual choices matter though not in the way people usually think The authors paint a new
picture of how social change happens arguing that our most powerful personal choices are those that springboard us into
working together with others warehouse worker Chris Smalls s unionization at Amazon is one powerful example Taking
inspiration from the writer Bill McKibben they stress how one important thing an individual can do is be somewhat less of an
individual Organized into three main parts the book first diagnoses the problem of either or thinking about social change
which stems from the false choice of making better personal choices or changing the system Then it offers a different way to
think about social change anchored in a new picture of human nature emerging across the social sciences Finally the authors
explore ways of putting this picture into practice Neither a how to manual nor an activist s guide Somebody Should Do
Something pairs stories with science plus some jokes to help readers recognize their own power turning resignation about
climate change and racial injustice into actions that transform the world *Journal of the American Veterinary Medical*
