

SERVICING THE MINOLTA SRT-101

by Leland R. Bartel

The Minolta SRT-101 was introduced by Minolta in 1966. It was the first of three SRT models. Along with the 101 model camera came a wide range of lenses and accessories to fit the needs of almost any photographer.

About two years ago Minolta yielded to competitive pressure for a lower priced model and brought out the SRT-100. The most noticeable difference between the 101 and the 100 is a differently designed standard lens. Some of the features missing from the SRT-100 are: the 1/1000 second shutter speed, the delayed action, the shutter speed readout in the viewfinder, and the wide range of ASA speeds. When the double exposure craze swept the market Minolta was quick to introduce the SRT-102. The 102 has all of the features of the 101 plus the double exposure feature, provisions for seeing the f-stop setting through the viewfinder as well as several other items.

As far as I can tell the internal mechanisms of the three SRT models are identical except for minor hardware changes which either remove or add certain features.

Recently I noticed another SRT model for sale in the camera department of one of the discount houses here in town. I understand that one of the large department stores also has its "own" SRT model for sale in its camera department! I haven't had the chance to examine each of the models but I'd guess that it is the same basic SRT-101 camera with a different model designation, standard lens, and miscellaneous features.

But what does this proliferation of models mean to you as a technician? It simply means that there are a lot of Minolta SRT models around and you are going to
