This extensively revised 6th Edition reflects the latest advances in research and features updated images, clinical features, and case studies to ensure a confident transition to practice. Each chapter follows a consistent straightforward format to simplify studying and reinforce understanding of normal control process issues, age-related issues, research on abnormal function, clinical applications of current research, and evidence to support treatments used in the rehabilitation of patients with motor control problems. **Motor Control** Anne Shumway-Cook, Marjorie H. Woollacott, 2017 This innovative and easy-to-understand book is the only resource available today that bridges the gap between current and emerging motor control research and its application to clinical practice. Online video case studies linked to the text examine motor control deficits in different types of neurologic pathology, including stroke, cerebellar pathology, cerebral palsy, multiple sclerosis, and Parkinson's disease, as well as in balance-impaired elders. Boxed Laboratory Activities give you hands-on practice in applying what you've learned. Answers appear at the end of the chapter. In-text learning aids, including Learning Objectives, point-by-point Summaries, and answers to Lab Activity Assignments, reinforce your understanding of key concepts. Extended Knowledge boxes provide in-depth material for more advanced students and practitioners. **Motor Control** Anne Shumway-Cook, Marjorie H.
