Motorola Android Phone 2013:

The Smartphone Elizabeth Woyke, 2011-05-10 A technology reporter's behind-the-scenes history of the device that has taken over our lives. How have smartphones shaped the way we socialize and interact? Who tracks our actions, our preferences, our movements as recorded by our smartphones? These are just some of the questions that Elizabeth Woyke, a journalist who has covered the industry for Bloomberg Businessweek, Forbes, and MIT Technology Review, addresses in this book. Including photos and an in-depth look at the early decades of mobile communication, *The Smartphone* offers not only a step-by-step account of how smartphones are designed and manufactured but also a bold exploration of the darker side of this massive industry, including the exploitation of labor, the disposal of electronic waste, and the underground networks that hack and smuggle smartphones. Featuring interviews with key figures in the development of the smartphone and expert assessments of the industry's main players—Apple, Google, Microsoft, and Samsung—*The Smartphone* is the perfect introduction to this most personal of gadgets. Your smartphone will never look the same again. The author does a good job explaining the relationships among the makers, carriers, and developers, and she delivers an engrossing chapter on design trends. Kirkus Reviews

Mergers, Acquisitions, and Other Restructuring Activities Donald DePamphilis, 2015-07-28 *Mergers, Acquisitions, and Other Restructuring Activities* is unique in that it is the most current, comprehensive, and cutting-edge text on M&A and corporate restructuring available. It is current in that it includes many of the most up-to-date and notable deals, e.g., Facebook's takeover of WhatsApp, the Dell privatization, and Verizon's mega buyout of Vodafone's share of Verizon Wireless, precedent-setting judicial decisions, e.g., efforts to overturn defenses at Airgas, and Sotheby's new regulations, e.g., expediting backend mergers, trends, e.g., increasing role of activist investors in takeovers, and new tactics, e.g., two-tiered poison pill, employed in M&A. Most integrative case studies are new for this edition and involve transactions that have been announced or completed since 2013. It is comprehensive in that nearly all aspects of M&A and corporate restructuring are explored. It is cutting-edge in that conclusions and insights are anchored by the most recent academic research, with references to more than 200 empirical studies published in leading peer-reviewed journals just since 2012. And the substantially updated content is illustrated with numerous practical exhibits, case studies involving diverse transactions, easy-to-understand numerical examples, and hundreds of discussion questions and practice exercises. The highlights of the new edition are listed here. **New Chapters** Two new chapters, Chapter 9 and Chapter 14. Chapter 9 discusses the basics of applying financial modeling methods to firm valuation and assists the reader in understanding the power and limitations of models in analyzing real-world situations. Chapter 14 illustrates how complex financial models often are used to support the deal structuring process during M&A negotiations. **New Cases** Ninety percent of the nearly forty case studies are new and involve transactions announced or completed during the last three years. These cases represent friendly, hostile, highly leveraged, and cross-border deals in ten different industries involving public and private firms as well as firms experiencing financial distress. All end-of-chapter case

studies begin with a Key Objectives section indicating what the student should learn from the case study and include discussion questions and solutions available in the online instructors manual Latest Research This edition focuses on the most recent and relevant academic studies some of which contain surprising insights changing the way we view this subject matter Recent research has significant implications for academicians students M A practitioners and government policy makers shedding new light on current developments and trends in the ever changing mergers and acquisitions market The market for corporate control and corporate restructuring strategies are constantly changing reflecting the ongoing globalization of both product and capital markets accelerating technological change escalating industry consolidation changing regulatory practices and intensifying cross border competition While continuing to be relevant empirical research covering the dynamics of the M A markets of the 1970s 1980s and 1990s may be less germane in explaining current undercurrents and future trends
