House of Commons: Science and Technology Committee,2012-02-21 The Met Office currently operates as a Trading Fund
within the Department of Business Innovation and Skills BIS The Committee welcomes the move to BIS particularly given the
potential for closer links with the research base and the opportunity to develop further its commercial activities Core services
though for the public service must be maintained The Met Office generates a significant proportion of its revenues from
Government contracts and Customer Service Agreements in addition to its commercial services and the Government should
provide clearly defined funding commitments This would allow the Met Office to take a longer term perspective on scientific
and operational development The Government has no plans to privatise the Met Office which the Committee saw as putting
at risk the strong partnerships built with international partners and the sharing of crucial meteorological data Also the
Committee welcomes the Government s initiative of Public Data Corporation Some concern though is expressed that
scientific advances in weather forecasting and the associated public benefits particularly in regard to severe weather
warnings are available but are being held back by insufficient supercomputing capacity The Met Office should attempt to
streamline the scrutiny of science under one committee and develop a strong customer relationship with key government
