

An aerial photograph of a winding river flowing through a valley. The sun is setting in the background, casting a warm, golden glow over the landscape. The river is a light brown color, contrasting with the green and brown of the valley floor. The sky is filled with soft, orange and yellow clouds.

*Miracle Or Coincidence* Yvonne Stockhausen Bazziel, 2007-12-01 A remarkable escape from shelling during the First World War a river that appears overnight in time for a baptism and disappears the same afternoon a particularly difficult piece of surgery completed with the aid of a mysterious voice are these the work of God or merely coincidence Drawing from a range of extraordinary experiences from the author's youth and her work in Jamaica Pakistan India and Burma these appealing and thought provoking stories leave readers to make up their own minds

**Miracle Or Coincidence?** Ed Ashurst, 2013 True stories about people living on the edge These are true stories not exaggerated Cowboy Stories which may or may not be the truth These stories are told to readers in the same way way they were told to the writer You be the jury It's up to you to decide whether if a true miracle has occurred or if it's simply a coincidence in the the universal realm of our existence

**The Philosophy of Miracles** David Corner, 2007-01-21 Philosophers who wish to argue for the rationality of belief in God frequently employ a god of the gaps strategy This strategy consists in trying to find a phenomenon that cannot be explained by natural science and insisting that it can be explained only by reference to the activity of God Philosophical discussion of miracles usually revolves around the attempt to link a miracle to God in just this way One of the problems with this approach is that it is very difficult to identify anything as being forever beyond the power of science to explain Science continues to advance upon the territory occupied by the god of the gaps Thus it is desirable to develop an account of divine agency that will not be subject to revision in the face of scientific progress This book is just such an account Drawing on recent work in the theory of action it shows that we can attribute God's agency to an event in nature without eliminating the possibility that it might be explained scientifically In bringing God's actions out of the gaps we avoid the possibility that future discoveries in science will make our talk of divine agency obsolete
