**Public Opinion and the End of Appeasement in Britain and France** Daniel Hucker, 2016-04-15 The 1930s policy of appeasement is still fiercely debated by historians critics and contemporary political commentators more than 70 years after the signing of the 1938 Munich Agreement What is less well understood however is the role of public opinion on the formation of British and French policy in the period between Munich and the outbreak of the Second World War not necessarily what public opinion was but how it was perceived to be by those in power and how this contributed to the policymaking process It therefore fills a considerable gap in an otherwise vast literature seeking to ascertain the extent to which public opinion can be said to have influenced the direction of foreign policy in a crucial juncture of British and French diplomatic history Employing an innovative and unique methodological framework the author distinguishes between two categories of representation firstly reactive representations of opinion the immediate and spontaneous reactions of the public to circumstances and events as they occur and secondly residual representations which can be defined as the remnants of previous memories and experiences the more general tendencies of opinion considered characteristic of previous years even previous decades It is argued that the French government of douard Daladier was consistently more attuned to the evolution of reactive representations than the British government of Neville Chamberlain and consequently it was the French rather than the British who first pursued a firmer policy towards the European dictatorships This comparative approach reveals a hitherto hidden facet of the diplomatic prelude to the Second World War that British policy towards France and French policy towards Britain were influenced by their respective perceptions of public opinion in the other country A sophisticated analysis of a crucial period in international history this book will be essential reading for scholars of the origins of World War II the political scenes of late 1930s Britain and France

Employées sans réelle distinction de sens par la plupart des commentateurs de la vie politique l'occasion des soiréeslectorales les expressions de fief bastion terre de mission et d'esercitoraux semblent communément renvoyer une identité politique locale où s'entremêlent tradition folklore et jeu d'influence d'une famille ou d'une personnalité politique Au-delà des clichés véhiculés par l'abondance de références métaphoriques ces expressions soulèvent de véritables enjeux méthodologiques pour les historiens travaillant sur les identités et cultures politiques l'approche biographique ou la monographie Appréhender le phénomène de territorialisation de la vie politique implique de prêter autant d'attention aux lecteurs explication des votes et analyse des comportements électoraux qu'aux élus travers le cumul des mandats le savoir-faire électoral ou la notabilité Cette voie d'entrée doit conduire analyser avec profit les positions de pouvoir politique et leur ancrage territorial C'est donc un programme ambitieux que se fixe cet ouvrage collectif puisqu'il s'agit cent ans après de reprendre nouveaux frais l'enquête pionnière conduite par André Siegfried en 1913 dans son fameux Tableau politique de la France de l'Ouest mais avec une double complexification La confrontation des travaux et méthodes d'une trentaine de spécialistes permet en effet de saisir l'ensemble national en variant les focales avec de surcroît quelques coups de projecteur sur l'international et le tout sur deux siècles d'histoire contemporaine S. Bernstein Cette démarche stimulante confirme tout l'intérêt d'une approche de la vie politique française sous l'angle territorial
