Johnson Fast Strike 175 Manual:

Fast Tanks and Heavy Bombers David E. Johnson, 2013-01-14 The U S Army entered World War II unprepared In addition lacking Germany's blitzkrieg approach of coordinated armor and air power the army was organized to fight two wars one on the ground and one in the air Previous commentators have blamed Congressional funding and public apathy for the army's unprepared state David E Johnson believes instead that the principal causes were internal army culture and bureaucracy and their combined impact on the development of weapons and doctrine Johnson examines the U S Army's innovations for both armor and aviation between the world wars arguing that the tank became a captive of the conservative infantry and cavalry branches while the airplane's development was channeled by air power insurgents bent on creating an independent air force He maintains that as a consequence the tank's potential was hindered by the traditional arms while air power advocates focused mainly on proving the decisiveness of strategic bombing neglecting the mission of tactical support for ground troops Minimal interaction between ground and air officers resulted in insufficient cooperation between armored forces and air forces *Fast Tanks and Heavy Bombers* makes a major contribution to a new understanding of both the creation of the modern U S Army and the Army's performance in World War II The book also provides important insights for future military innovation

Veja ,1992 *Practical Farmer* ,1876 The Logic of Force Christopher M. Gacek,1994 This study examines the disparities between the two dominant American political military approaches to the use of force as an instrument of foreign policy The first approach argues that if force is employed it should be used at whatever level necessary to achieve decisive military objectives The second approach argues that certain limits to the use of force may be necessary and acceptable Case studies illustrate how the basic disagreements between the two approaches influence policy making and military decisions Included in the text is discussion of Vietnam Panama the Gulf War Somalia and the former Yugoslavia

G-Force: Flying the World's Greatest Aircraft James Bennet, 2016-10 Read what military pilots have to say about flying some of the most incredible fighting aircraft ever built It's like a 20 million strap on carnival ride AH 64 Apache Pilot I had high expectations and it's beat every one of those The whole jet is awesome F/A 18F Super Hornet pilot The role of the pilot has changed hugely in the last sixty years of military aviation Jet pilots in the 1960s flying types such as the Harrier and F 102 would have spent a huge portion of their concentration just keeping the aircraft under control That left little spare mental capacity to locate and engage the enemy Today the opposite is true Computers have made flying so simple that it is now considered very easy to fly the SAAB Gripen or Lockheed Martin F 35 Lightning II allowing the pilot to focus fully on his or her mission *G Force Flying the World's Greatest Aircraft* is a celebration of the experience of flying some of aviation's most spectacular powerful and dangerous machines from early jet fighters such as the F 86 Sabre and MiG 15 to today's F 22 Raptor and Eurofighter Typhoon Packed with first hand interviews with test and combat pilots from the world's air forces and illustrated with extensively researched and striking imagery *G Force Flying the World's Greatest Aircraft* is a thrilling ride
