Journal Factor Impact :

Does the Journal Impact Factor Help Make a Good Indicator of Academic Performance? Sudhanshu K. Mishra, 2010 Is journal impact factor a good measure of research merit This question has assumed a great importance after the notification of the University Grants Commission Minimum Qualifications for Appointment of Teachers and other Academic Staff in Universities and Colleges and Measures for the Maintenance of Standards in Higher Education Regulations 2009 on September 23rd 2009 Now publication of research papers articles in reputed journals has become an important factor in assessment of the academic performance of teachers in colleges and universities in India One of the measures of reputation and academic standard rank or importance of a journal is the so called Impact Factor This study makes a detailed statistical analysis of Journal Impact Factors across the disciplines It finds that if journal impact factor is used to assess the academic performance of individuals for the purpose of selection promotion etc and it is not borne in mind that due to vast differences in the nature of distribution of impact factors across the disciplines they are not justifiably comparable a below average scholar in the one discipline will rank higher and will be honored and benefitted more than another scholar in some other discipline wherein the journal impact factor is adversely skewed It may be noted that in the university departments there are specializations with low impact factor journals and other specializations with very high impact factor journals But the teachers researchers of different specializations in the departments compete with each other for promotion In this milieu the researchers with an unfortunate specialization wherein the journal impact factor is mingy or adversely skewed would receive injustice is plainly predetermined Therefore a measure such as the h index which quantifies the quality as well as productivity of an individual author scholar would be more appropriate than the journal impact factor The h index may be fine tuned and hence the g index or Tol s index may be used Nevertheless even the h index and the Tol s index would not be appropriate to the purpose of inter disciplinary or inter specialization comparisons A more informed and balanced judgment of the expert committee for selection appointment and promotion purposes will continue to be extremely important

Qualitative Inquiry in the Public Sphere Norman K. Denzin, Michael D. Giardina, 2018-04-19 Qualitative Inquiry in the Public Sphere examines the relationships between public scholarship the research marketplace and the politics of higher education It is written from the perspective that higher education is under attack from multiple sides both political and economic that academics reside in a precarious position one fraught with accountability metrics funding pressures and spiralling bureaucracy and that scientific knowledge itself is increasingly contentious in public These internal and external pressures have fundamentally transformed the public sphere of higher education from one of rational public discourse by and for the public good to one of private market relations and strategic research decisions In turn these transformations have fundamentally altered what it means to be a productive scholar within this space altered what it means to be a public researcher in this space Leading international voices from the United States Canada Germany the United Kingdom and Norway collectively present a forceful rebuke to such developments raising a clarion call to action on topics ranging from scholarly publishing audit culture and the privatization of public knowledge to Indigenous arts based and collaborative research methods Qualitative Inquiry in the Public Sphere is a must read for faculty and students alike interested in the politics of being a public researcher of conducting research in and influencing dialogue in the public sphere
