**Multipliers of Change** Wolf, Tobias, Niedermeier, Frank, Qin, Xia, Faaß, Marcel, Cheng, Ming Yu, Ong, Duu Sheng, Mustafa, Marzuki, Ewe, Hong Tat, Pillai, Stefanie, Ong, Sue Lyn, Abdul Rahman, Mohd Basyaruddin, Waswa, Fuchaka, Abenga, Elizabeth, Indede, Florence, Echeverría King, Luisa Fernanda, Acuña Paez, Katherine, Coronado Vargas, Carlos, Musa Alokpo, Dieudonné, Oulare, Kabiné, Randhahn, Solveig, Mawa, Michael, 2020-12-02 Higher Education Leadership and Management have become increasingly important throughout the years due to the complexities that have to be addressed by universities worldwide. This can be seen not only in professionalisation in fields such as faculty management or in areas of quality assurance and internationalisation but also in the need for exchange and training in academic leadership such as that of deans or study deans or of university leadership in general. The Dialogue on Innovative Higher Education Strategies DIES is addressing this need in emerging countries by building platforms of exchange and offering training courses. Not only is the programme supporting capacity building of human resources but it is also specifically focusing on inducing change within the universities such as introducing new instruments or tools in the area of quality assurance and internationalisation and addressing specific challenges or setting up new structures in the form of projects in the frame of the training. The National Multiplication Trainings Programme under DIES is further addressing the sustainability and multiplication of the DIES Programme that is alumni are enabled to implement capacity building in higher education leadership and management in their national context. The articles within this volume of the Potsdamer Beitr ge zur Hochschulforschung Potsdam Contributions to Higher Education Research analyse and share the experiences of such training programmes held in Colombia, Democratic Republic of Congo, Guinea, Malaysia, Kenya and Uganda. They all revolve around the best ways to address the needs and challenges in higher education leadership and management and in building capacities in these areas.

*Advances in Integrated Disease Management (IDM) For Soil-Borne Plant Pathogens: Innovative Approaches and Underlying Action Mechanism at Molecular Level, 2nd edition* Raja Asad Ali Khan, Musharaf Ahmad, 2025-09-24 Soil borne plant pathogens are responsible for many diseases in plants and have large genetic diversity affecting plants in warm temperate, subtropical as well as tropical zones. This has a significant impact on the economics of both developed and developing countries worldwide. Unfortunately, the protection of plants is mainly provided through the extensive use of synthetic chemicals. These have demonstrated their protective efficiency but at the expense of having detrimental effects on both the health of humans and the environment. Furthermore, several soil borne plant diseases have no effective chemical treatment. Because of the nature of hidden enemy, soil borne genetic diversity, high multiplication rate, diverse infestation mode, wide host range and complicated biology, soil borne plant pathogens are usually difficult to manage and cannot be adequately controlled by single management practice. Therefore, it necessitates the implementation of an IDM strategy to minimize the pathogen impact and reduce disease losses. Integrated disease management (IDM) in plant protection

includes multiple strategies and kinds of control measures to reduce chemical pesticides. It includes the development of diverse ways of combining complementary approaches to manage pests by promoting the eco friendly use of natural molecules and biocontrol microbes alone or in combination to manage plant pathogens without having an impact on non target species. Because of their ability to inflict heavy damage to the economically important plants they infect, soil born plant pathogens have been the subject of intensive research and scientists are struggling to explore the IDM approach combining cultural practices, biological control measures and resistance of host plants to manage them. In this Research Topic we welcome original research, review, mini review and systematic review papers on the latest findings related to the integrated management of soil born plant pathogens and the underlying action mechanism. A better comprehension of new findings, action mechanisms at molecular level and implications of applying new management approaches can help to achieve better management of soil borne plant pathogens while maintaining satisfactory performance from both qualitative and quantitative perspectives. Topics may include but are by no means limited to: Enhancing host plant resistance to soil borne pathogens; Plant defense response; genetic regulation to soil borne pathogens; Bacteria, fungi and nematodes and application of management strategy; Bio control agents, their products and action mechanism against soil borne plant pathogens; New IDM component for soil borne plant pathogens; Molecular interaction between plants and bio control agents against soil borne plant pathogens; Soil amendment for the management of soil borne plant pathogens; Nanotechnological approaches for the management of soil borne plant pathogens.

*Generating Actionable Climate Information in Support of Climate Adaptation and Mitigation* Andreas Marc Fischer, Janette Bessembinder, Fai Fung, Hans Olav Hygen, Katharine Jacobs, 2024-07-04

Climate change is under way in full extent adversely affecting more and more facets in nature, society and economy. The observations and the projections of these changes are increasingly important to consider in long term planning given the need to adapt to the multi sectoral climate impacts that can be anticipated. In most cases it is the information on the local scale in a user oriented way that is most relevant in this context. Over recent years many countries and organisations have set up climate services such as factsheets, brochures, web tools, data to enable downstream applications and to form a decision support basis for climate action planning e.g. KNMI14 in the Netherlands, UKCP18 in the UK, CH2018 in Switzerland, Climate Change in Australia, NCA4 in the US, Copernicus Climate Data Store, C3S.
