

Abstract

- Before inserting the batteries, adjust the timer to 0:00 by using the Time Setting knob to rotate the hands **CLOCKWISE**.
- Install four "C" size alkaline batteries according to the "+" symbols in the battery holders.
- Set the time by using the Time Setting knob to rotate the hands **CLOCKWISE**. If setting the time for PM, make sure the hour hand passes through 12 o'clock once until the desired time is shown. While setting the time, it is normal to hear sounds from the movement or speaker. Continue advancing the time until the correct time is shown. Once the time is set, the watch will adjust for the time selected, however it is important that the clock movement be allowed to operate for at least one hour for the alarm mechanism to become fully functional. The clock may show out of sequence during the first hour of operation. The quartz movement is highly accurate and has been calibrated at the factory for accurate time keeping.
