policy makers Radical change thus appears necessary as Futurism and Eco Pessimism emerge as two fundamental challenges to the status quo The Futurist claims that the current dynamism of technology is incompatible with human limitations while the Eco Pessimist sees the climate crisis as symptomatic of a broader human domination over nature What these seemingly opposite currents have in common is a shared rejection of the human frame as grounding politics each seeks to subordinate the human in favor of a wholly alien other either in the form of an anarchic nature or a dynamic technology To transcend this strange coincidence of opposites Prometheus and Gaia makes the positive case for a humanism that is rationalist without being anthropocentric

Contemporary Paganism C. Barner-Barry,2005-03-01 This book explores the legal bias in the United States against Paganism and other non Christian religions Despite being one of the most religiously diverse countries in the world the U S legal system

developed when the population was predominantly Christian Built into the law is the tacit assumption that all religions and religious practices resemble Christianity Using the Pagans as a case study Barner Barry shows how their experiences demonstrate that both the law affecting nondominant religions and the judiciary that interprets this law are significantly biased in favor of the dominant religion Christianity This creates legal problems as well as problems of intolerance for religions with significantly different practices Special attention is given to a series of Supreme Court decisions interpreting the Freedom of Religion Clause in terms of neutrality and interpreting the Establishment Clause loosely and its impact on nondominant religions in the US
