Patterns of Text Michael Hoey, Mike Scott, Geoff Thompson, 2001-01-01 It is increasingly clear that in order to understand language as a phenomenon we must understand the phenomenon of text Our primary experience of language comes in the form of texts which embody the complete communicative events through which our language using lives are lived These events are shaped by communicative needs and this shaping is reflected in certain characteristic patterns in the texts However the nature of texts and text is still elusive we know which forms are typically found in text but we do not yet have a full grasp of how they constitute its textuality how they make a text tick The twelve contributions to this volume show how texts across a wide range of text types hold together by different patterns of chunking and linking The common purpose in all the contributions is to explore the nature of text patterning as the functional environment within which language operates
