

# INVERSE VARIATION

## RECALL: DIRECT VARIATION

A **DIRECT VARIATION** has the form

$$y = kx$$

where,  $k \neq 0$ .

The value  $k$  is the constant of variation.

## INVERSE VARIATION

An **INVERSE VARIATION** has the form

$$xy = k \quad \text{or} \quad y = \frac{k}{x} \quad \text{or} \quad x = \frac{k}{y}$$

where,  $k \neq 0$ .

When one quantity increases, the other decreases proportionally. The value  $k$  is the constant of variation.

### GUIDED EXAMPLE 1:

Find the constant of variation and use it to write a direct variation equation to represent the table below.

| x  | y   |
|----|-----|
| 2  | 5   |
| 4  | 2.5 |
| 6  | 1.7 |
| 10 | 1.0 |
| 12 | .83 |

### GUIDED EXAMPLE 2:

Find the constant of variation and use it to write an inverse variation equation to represent the table below.

| x   | y  |
|-----|----|
| 0.5 | 24 |
| 1   | 12 |
| 2   | 6  |
| 3   | 4  |
| 4   | 3  |

Determine if the relationship between the values in each table represents a direct variation, an inverse variation, or neither. Then, write an equation to model the direct and inverse variations.

**Biology and Paleobiology to Manage Biodiversity and Ecosystems in a Changing World** G. Lynn Wingard,Chris Schneider,Gregory P. Dietl ,Damien Fordham, Policy makers and resource managers must make decisions that affect the resilience and sustainability of natural resources including biodiversity and ecosystem services However these decisions are often based on evidence or theory derived from highly altered systems and over short time periods of low magnitude environmental and climatic change Because natural systems change and evolve across multiple timescales from instantaneous to millennial long term understanding of how past life has responded to perturbations can inform resource managers By using these natural laboratories of the past conservation paleobiology and paleoecology provide the framework necessary to anticipate and plan for future changes The goal of this Research Topic is to heighten awareness among conservation and restoration practitioners to the value and applications of long term perspectives provided by conservation paleobiology and paleoecology Most conservation studies focus on systems already impacted by anthropogenic change these studies would benefit from paleontological data through expanded temporal scales identification of baselines and an understanding of how organisms have responded to past changes However resource management decisions rarely include input from paleontologists and paleoecological research is rarely incorporated into conservation decision making We seek to bridge this research implementation gap by highlighting the application of paleoecological data to issues such as biodiversity dynamics extinction risks and resilience to perturbations among other topics We hope to foster new cross disciplinary synergies by encouraging conservation scientists and managers to collaborate with paleontologists to improve conservation decision making and by increasing awareness among paleontologists to the needs of the resource management community This Research Topic will provide a forum for both the paleontological and resource management communities to exchange ideas that will enhance restoration and conservation decision making We invite papers on conceptual advances reviews of specific topics to guide efforts in research or practice case studies of successful applications articles describing datasets with applied value and perspective papers summarizing a body of paleontological research with relevance to the resource management community Topics can include but are not limited to Responses of species communities and ecosystems to perturbations Strategies to achieve the direct integration of paleobiology and paleoecology into on ground resource management Identifying baselines and reference conditions Increasing the robustness of forecasting models through the incorporation of paleontological data Identifying key species interactions and other phenomena as indicators of impending change New methodologies analytical tools and or proxies in the application of paleontological data to conservation and restoration practice Lynn Wingard Damien Fordham and Greg Dietl have no conflicts of interest Chris Schneider has a
