Jdp 5 00 3 Rd Edition:

The Right to Life in Armed Conflict Ian Park, Ian David Park, 2018 What place does the right to life have in armed conflicts And does it lock down military objectives In the first sustained coverage of the area Ian Park examines conflicts in Iraq Afghanistan Libya and Syria to explicate how far governments should be entitled to derogations from human rights whilst engaging in combat operations

British Air Power Viktoriya Fedorchak, 2018-09-20 British Air Power demonstrates how the Royal Air Force sought to adapt in regard to the roles it could play and the conflicts in which it could be used as well as the evolution of air power doctrine at a time of rapid changes in national politics and in the international arena The development of new concepts and theories the evaluation of operational experience the political environment and budgetary cuts and the role of academics and personalities in development of doctrine are thus all explored to show changes in strategic thinking regarding air power Fedorchak further examines the influence of jointery the process of co operation between the army navy and air force on thinking conceptualising teaching and using air power in recent operations in Afghanistan Iraq Libya and Syria A contemporary complement to more historical studies British Air Power provides a very detailed look at the development of air land doctrine in the RAF since the turn of the century

The Concept of Military Objectives in International Law and Targeting Practice Agnieszka Jachec-Neale, 2014-10-24 The concept that certain objects and persons may be legitimately attacked during armed conflicts has been well recognised and developed through the history of warfare This book explores the relationship between international law and targeting practice in determining whether an object is a lawful military target By examining both the interpretation and its post ratification application this book provides a comprehensive analysis of the definition of military objective adopted in 1977 Additional Protocol I to the four 1949 Geneva Conventions and its use in practice Tackling topical issues such as the targeting of TV and radio stations or cyber targets Agnieszka Jachec Neale analyses the concept of military objective within the context of both modern military doctrine and the major coalition operations which have been undertaken since it was formally defined This monograph will be of great interest to students and scholars of international law and the law of armed conflict as well as security studies and international relations

Propaganda, Power and Persuasion David Welch, 2013-11-27 As Philip Taylor has written The challenge of the modern information age is to ensure that no single propaganda source gains monopoly over the information and images that shape our thoughts If this happens the war propagandists will be back in business again Propaganda came of age in the Twentieth Century The development of mass and multi media offered a fertile ground for propaganda while global conflict provided the impetus needed for its growth Propaganda has however become a portmanteau word which can be interpreted in a number of different ways What are the characteristic features of propaganda and how can it be defined The distinguished contributors to this book trace the development of techniques of opinion management from the First World War to the current conflict in Afghanistan They reveal how state leaders and spin doctors operating at the behest of the state

sought to shape popular attitudes at home and overseas endeavouring to harness new media with the objective of winning hearts and minds The book provides compelling evidence of how the study and practice of propaganda today is shaped by its history **Bradshaw's monthly railway and steam navigation guide** George Bradshaw,1906 *European Air Power* JOHN ANDREAS OLSEN,2014-07-15 *European Air Power* examines the current state of eight separate European air forces and their prospective air power capabilities in a manner that will appeal to a wide audience of air force enthusiasts Included are perspectives from independent air power experts reviewing the air forces of France Germany Turkey and Great Britain as well as from the leaders of the air forces of the Nordic nations including Norway Denmark Sweden and Finland Within the national security framework of threats and challenges and against the seemingly universal backdrop of lower budgets for defense the contributors present varying views on the types of air power capability a state should have and those it does not need The contributors consider each air force separately and how each is structured to remain sustainable and efficient in accordance with its national strategic infrastructure **The Lawn Tennis Library** ,1928 *American Lawn Tennis* ,1928 Lloyd's Register of British and Foreign Shipping ,1879 *The Quest of the Davis Cup* Stephen Wallis Merrihew,1928 **The Babylonian Expedition of the University of Pennsylvania** University of Pennsylvania.
