Mediclinic Nursing Program 2016:

The Report: Dubai 2019 Oliver Cornock, Near term sentiment is on the rise amongst Dubai's business leaders with the IMF forecasting a healthy GDP growth rate of 4.2% in 2019 for the emirate. While not as exposed as some of its regional neighbours to the effects of fluctuating commodities prices in recent times, Dubai nevertheless stands to benefit from the knock on effects of higher prices over the last year. *Cancer Care in the United Arab Emirates* Humaid O. Al-Shamsi, 2024-09-17 This open access book is an unprecedented and comprehensive book that delves deeply into the landscape of cancer care in the United Arab Emirates (UAE). Al-Shamsi, a leading oncologist in the region and the President of the Emirates Oncology Society, embarks on a compelling journey by meticulously examining the evolving cancer policies, treatment modalities, and innovative approaches while celebrating notable success stories. At the same time, it sheds light on the persistent challenges and unmet needs that continue to impact cancer care in the UAE. Technology and Patient Care Priscilla O. Okunji, 2019-03-15 Nursing Informatics Connecting Technology and Patient Care prepares students to enter a healthcare system brimming with technology. The text introduces students to the complex and critical world of health informatics and provides them with the necessary tools and knowledge to develop measurable goals in data management through health technologies. The text is divided into five units. In Unit I, students learn about the role of informatics in healthcare and how computer technology has changed the face of modern medical practices. Unit II explores nursing informatics, the external drivers of informatics technology, and how informatics are used in documentation and other administrative activities. Unit III focuses on system interoperability, data mining, evidenced-based research in nursing, and more. In Unit IV, readers learn about e-health, health information systems, and the importance of confidentiality, security, and integrity. The final unit speaks to digital libraries and computing and features scholarly articles on e-learning. Designed to align with AACN accreditation standards, TIGER competencies, and the QSEN skills, knowledge, and attitude needed by nurses at all levels, *Nursing Informatics* is an excellent resource for undergraduate and graduate courses with focus in health informatics. Priscilla O. Okunji earned both her B.S.N. and M.S. in nursing informatics and administration respectively from the University of Maryland. She earned her Ph.D. in health sciences from Trident University. She is a registered nurse and a tenured associate professor of nursing at Howard University College of Nursing and Allied Health Sciences, where she taught nursing informatics and spearheaded the development of the university's RN to BSN online program, which she coordinated from 2011-2016. She currently teaches health assessment, nursing research, and leadership online in the Division of Nursing. Her research interests are in cardiovascular and chronic diseases using big data to knowledge. She is also involved in coordinating culturally tailored health education and the screening of chronic diseases in the District of Columbia metropolitan area within the African immigrant community.
