Economist,2012-03-22 In 2050 there will be 9.3 billion people alive compared with 7 billion today and the number will still be rising The population aged over sixty five will have more than doubled to more than 16 per cent China s GDP will be 80 per cent more than America s and the number of cars on India s roads will have increased by 3 880 per cent And in 2050 it should be clear whether we are alone in the universe What other megachanges can we expect and what will their impact be This comprehensive and compelling book will cover the most significant trends that are shaping the coming decades with each of its twenty chapters elegantly and authoritatively outlined by *Economist* contributors and rich in supporting facts and figures It will chart the rise and fall of fertility rates across continents how energy resources will change in light of new technology and how different nations will deal with major developments in science and warfare *Megachange* is essential reading for anyone who wants to know what the next four decades hold in store Digital Age: Chances, Challenges and Future Svetlana Igorevna Ashmarina,Marek Vochozka,Valentina Vyacheslavovna Mantulenko,2019-07-27 This proceedings book presents the outcomes of the VII International Scientific Conference Digital Transformation of the Economy Challenges

Trends New Opportunities which took place in Samara Russian Federation on April 26 27 2019 Organized by the Samara State University of Economics the conference chiefly focused on digital economy issues such as theoretical preconditions for the development of economic systems in the digital age and specific practical issues related to real world business practice Consisting of six chapters corresponding to the thematic areas of the conference and written by scientists and practitioners from different regions of Russia Kazakhstan the Czech Republic and Germany the book offers answers to the most pressing questions for today's business community How is our world changing under the influence of digital technology Is sustainable economic development a myth or reality in the context of digitalization What threats and opportunities does digitalization bring What are realities and prospects of digitalization in the context of business practice How do we create a digital infrastructure for the economy How should the legal environment of the economy be transformed in the context of digitalization The conclusions and recommendations presented are not recipes for solving the existing economic problems but instead are intended for use in further research on transformation processes in the economy and in the development of state economic policies in various countries and regions

Towards a Better Global Economy Franklin Allen, Jere R. Behrman, Nancy Birdsall, Shahrokh Fardoust, Dani Rodrik, Andrew Steer, Arvind Subramanian, 2014-09-04 Substantial progress in the fight against extreme poverty was made in the last two decades But the slowdown in global economic growth and significant increases in income inequality in many developed and developing countries raise serious concerns about the continuation of this trend into the 21st century The time has come to seriously think about how improvements in official global governance coupled with and reinforced by rising activism of global citizens can lead to welfare enhancing and more equitable results for global citizens through better national and international policies This book examines the factors that are most likely to facilitate the process of beneficial economic growth in low middle and high income countries It examines past present and future economic growth demographic changes the hyperglobalization of trade the effect of finance on growth climate change and resource depletion and the sense of global citizenship and the need for global governance in order to draw longer term implications identify policy options for improving the lives of average citizens around the world and make the case for the need to confront new challenges with truly global policy responses The book documents how demographic changes convergence and competition are likely to bring about massive shifts in the sectoral and geographical composition of global output and employment as the center of gravity of the global economy moves toward Asia and emerging economies elsewhere It shows that the legacies of the 2008 09 crisis high unemployment levels massive excess capacities and high debt levels are likely to reduce the standard of living of millions of people in many countries over a long period of adjustment and that fluctuations in international trade financial markets and commodity prices as well as the tendency of institutions at both the national and international level to favor the interests of the better off and more powerful pose substantial risks for citizens of all countries The chapters and their policy implications are intended to stimulate public interest and facilitate the

exchange of ideas and policy dialogue *The Psychology of the Asian Consumer* Bernd Schmitt, Leonard Lee, 2015-07-03

Why is it important to conduct research on the psychology of the Asian consumer What research themes have already emerged What are the relevant theories and practical applications based on this research These are some of the questions and issues addressed in this unique book With chapters written by experts in their field *The Psychology of the Asian Consumer* highlights how consumer psychology can contribute to an understanding of Asian consumer behaviour and is especially timely in light of today's global economy and its focus on the Pacific Rim Chapters are organised around the key concepts of theory and culture and include numerous case studies and practical applications The book focuses on research summaries that provide readers with important need to know information [Journal of Development Policy Review \(JDPR\)](#)
