of numerous typographic errors beyond the control of the writer was very soon exhausted An apology is due the many to whom during the last ten years a new edition has been repeatedly promised The writers only excuse for the failure to fulfill these promises has been the pressure of other work that has prevented such fulfillment In the final accomplishment of these promises the book has been practically rewritten and more than doubled in size The autopsy method given in the main text is a composite one made up from the Rokitsansky Virchow Chiari and Nauwerck methods according to the judgment of the writer as to what was the best in these and put together with modifications and additions arising out of his own experience The aim has been to offer a method by which an autopsy can be performed with the greatest speed and ease and at the same time with the greatest completeness the various steps of the operation following in logical order in such a way that nothing can be lost or destroyed and thereby revealing a complete picture of the pathologic conditions present A choice of methods is offered whenever the aims of the examination may be so varied as to make variations in method advantageous The general order of the autopsy is the same as that given in the Protocol Blank book the present book being designed as a guide and reference book for that The points to be noted in the examination of each region are given in connection with the method of examination of that region and represent the condensed special pathology of the latter This should be of great service to the beginner in autopsy work as affording a concise but complete guide to the most important conditions of each region A text book on Special Pathology should be used as a reference book in connection with these condensed statements of special pathology The technical methods for microscopic examination given in Part II have been brought up to date and all recent methods of value included Original methods have been given in preference to modifications the latter when of value are also mentioned As a rule that method has been chosen which in the light of the writers laboratory experience has yielded uniform the best results About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works
