*Meaning, Discourse and Society* Wolfgang Teubert, 2010-03-25 *Meaning Discourse and Society* investigates the construction of reality within discourse When people talk about things such as language the mind globalisation or weeds they are less discussing the outside world than objects they have created collaboratively by talking about them Wolfgang Teubert shows that meaning cannot be found in mental concepts or neural activity as implied by the cognitive sciences He argues instead that meaning is negotiated and knowledge is created by symbolic interaction thus taking language as a social rather than a mental phenomenon Discourses Teubert contends can be viewed as collective minds enabling the members of discourse communities to make sense of themselves and of the world around them By taking an active stance in constructing the reality they share people thus can take part in moulding the world in accordance with their perceived needs *Critical Humanist Perspectives* Adrian Pablé, 2017-05-18 The present book is a collection of scholarly reflections on the theme of humanism from an integrational linguistic perspective It studies humanist thought in relation to the philosophy of language and communication underpinning it and considers the question whether being a humanist binds one to a particular view of language The contributions to this volume explore whether integrational linguistics being informed by a non mainstream semiology and adopting a lay linguistic perspective can provide better answers to contentious ontological and epistemological questions concerning the humanist project questions having to do with the self reason authenticity creativity free agency knowledge and human communication The humanist perspectives adopted by the contributors to this volume are critical insofar as they start from semiological assumptions that challenge received notions within mainstream linguistics such as the belief that languages are fixed codes of some kind that communication serves the purpose of thought transfer and that languages are prerequisites for communication **Variation in Time and Space** Anna Čermáková, Markéta Malá, 2020-12-07 *Variation in Time and Space* Observing the World through Corpora is a collection of articles that address the theme of linguistic variation in English in its broadest sense Current research in English language presented in the book explores a fascinating number of topics whose unifying element is the corpus linguistic methodology Part I of this volume *Meaning in Time and Space* introduces the two dimensions of variation time and space relating them to the negotiation of meaning in discourse and questions of intertextuality Part II *Variation in Time* approaches the English language from a diachronic point of view the time periods covered vary considerably ranging from 16th century up to present day so do the genres explored Part III *Variation in Space* focuses on global varieties of English and includes a contrastive point of view The range of topics is again broad from specific lexico grammatical structures to the variation in academic English combining the regional and genre dimensions of variation This is a timely volume that shows the breadth and depth in current corpus based research of English *Patterns in Language and Linguistics* Beatrix Busse, Ruth Moehlig-Falke, 2019-12-16 Despite its importance for language and cognition the theoretical concept of pattern has received little attention in linguistics so far The

articles in this volume demonstrate the multifariousness of linguistic patterns in lexicology corpus linguistics sociolinguistics text linguistics pragmatics construction grammar phonology and language acquisition and develop new perspectives on pattern as a linguistic concept
