millions of dollars spent searching the ocean bottom for the wreckage site no one has been able to determine what really happened Until now For this book three professional accident investigators each with decades of real world experience in crash dynamics examined the available evidence The results of their work reveal the actual sequence of events and what really happened to MH370 This book uses plain language easy to understand schematics and clear photos of the actual wreckage to bring the evidence to life Even those with little or no aviation connection will be able to understand and appreciate the validity of this eye opening analysis You will see that the official investigation was deficient They missed or misinterpreted crucial evidence that was available on the recovered wreckage pieces Therefore they used incorrect assumptions about what was happening onboard MH370 when they calculated the boundaries for their search zones This book will reveal why the multi million dollar ocean bottom search efforts had almost no chance of success You will be guided through a basic investigation and analysis process to show what caused MH370 to disappear from radar and to fly on an unexplained and mysterious track that led to the southern Indian Ocean Many people have presented theories to try to explain the MH370 disappearance This book shows you a basic investigation framework where theories that are based on speculation and guesswork can be invalidated You are left with only one scenario that is totally based on confirmed facts The known and indisputable evidence fits with only one chain of events and that is the chain of events presented by the author With this book the mystery of MH370 has been solved *MH370: the Secret Files* Nigel Cawthorne, 2016-03-03 On 8 March 2014 Malaysia Airlines Flight 370 took off from Kuala Lumpur International Airport bound for Beijing Less than an hour after take off somewhere over the South China Sea the plane simply vanished One eyewitness saw a burning object crash into the sea But confusing radar signals trace tracked an aircraft taking an erratic course across the Malaysian peninsula then on to the Andaman Sea Did it crash there Or did it fly on to land safely in disputed lands of Central Asia or the top secret CIA black site on Diego Garcia Data from the Rolls Royce engines tracked by Inmarsat was said to indicate that it might have ditched in the furthest reaches of the South Indian Ocean We know more about the surface of the moon than the bottom of the sea there And the weather and currents are so bad it may never be found Convenient Two years later the Australians are still search at the cost of billions and have found nothing But was the search in such a remote place part of a cover up to distract the world s attention because the US Navy had in fact shot the plane down Since the invention of radio radar satellite navigation and the internet the world has become a smaller place The answer must be out there Or perhaps hidden within the pages of the secret files [MH370 Explains](#) Debora Azbell, 2021-07-05 Malaysia Airlines Flight 370 was a scheduled international passenger flight operated by Malaysia Airlines that disappeared on 8 March 2014 while flying from Kuala Lumpur International Airport to its planned destination Beijing Capital International Airport Five years after a state of the art Boeing 777 vanished into the night over the South China Sea the renowned science and aviation author of the book offers a compelling and detailed account of what happened that night and in the months and years that followed *The Last Flights*

of Malaysian Airlines MH370 and MH17 Azharuddin Abdul Rahman, 2022-10-14 Having always been in love with all things related to aviation since childhood Azharuddin Abdul Rahman's dream came true when he was given a chance to enter the field of aircraft engineering. Serving as Director General for eleven years with the Department of Civil Aviation DCA he had had many valuable experiences. However the two biggest tragedies that occurred in 2014 that of MH370 and MH17 had the greatest impact on his life and affected not just the victims and their families but the entire Malaysian aviation industry. Azharuddin was directly involved in leading the search missions of the tragic disappearance of MH370 on 8 March 2014 and in a series of investigations concerning the downing of MH17 in eastern Ukraine on 17 July of the same year. As Director General Azharuddin faced a heavy burden in the aftermath of the twin disasters of which MH370 remains unsolved to the present day. No one was prepared for the MH370 tragedy despite all the training they had received. As for MH17 Azharuddin laments that the tragedy may have been prevented had full information on the level of conflict in Ukraine been made available during that time. In both cases all passengers and crew on board were killed. Both tragic events marked a new history in the aviation industry both in Malaysia and in the international arena causing new reforms to burst into action to ensure similar incidents will not happen again. In writing this book Azharuddin draws from personal experience conducting his research with and around aviation industry professionals and drawing insights from others involved in both incidents to present a full and raw take on the twin disasters of the Malaysian aviation industry in 2014. Malaysia Flight Mh370 - Lost in the Dark John P. Choisser, 2014 The missing flight isn't in the news quite as much now. The pings have stopped and the search is entering a second much slower phase. The unanswered questions are many. But by most accounts it is being assumed that the pilots are criminals, suicidal maniacs, hijackers or terrorists since no one else on the airplane appears to fit those descriptions. It may be a long time before we know for sure but in the meantime I believe the public and particularly the pilot's families need to know that there is a high likelihood that they are victims and heroic victims at that. The purpose of this book is also not to place blame on anyone in particular although as we'll see there might have been an opportunity to save the airplane. In the news there does not seem to be much credibility given to the possibility that what happened was an accident. A rare accident we hope but an accident nonetheless. But even given an accident can blame be placed for making the situation worse? Could there have been negligence in avoiding the escalation of an accident into a disaster? I say yes. I believe we can place blame for this and it's not on the pilots. Knowing more about how the airplane and its various systems work will help members of the public more accurately judge the relevancy of the various scenarios being discussed. I can imagine some of my friend's eyes glazing over while reading some of the technical information presented in this book. And skimming over those sections or skipping them is OK. But these are the bases for the conclusions I reach so you can either read them or take them on faith. This kind of knowledge will also answer questions like why didn't the passengers answer their cell phones and was someone hiding in the cargo bay and how can the airplane fly by itself and a hacker got into the

flight computer and flew the airplane If we keep speculation grounded in the real world based on how things actually work and don't work some of the more realistic theories can be better evaluated That's why there is so much engineering stuff in this book which you may want to skip over It's there as much to explain what is impossible as much as what things are possible My hypothesis is that the pilots are heroes Lost in the dark without flight instruments with smoke in the cockpit flying under extreme stress and awesome responsibility and hoping against hope to see a fighter interceptor outside their window to guide them home they knew the minutes left on their oxygen system were numbered They have not survived their ordeal and in my opinion died trying to save the flight And this small book will not bring solace to the families of the rest of the crew and passengers But the dedicated effort the pilots and crew probably made amidst the terror and confusion may be worthy of hero status I feel for all of the victims families but especially for the families of the pilots who are not only grieving but whose probably heroic loved ones are perhaps necessarily but unfortunately being labeled otherwise

The Secret of the Seventh Arc: The Story About the Disappearance of the Malaysian Flight MH-370 Milos Jesensky, Stanislaw Bednarz, Robert Lesniakiewicz, 2021-01-15 It is an unheard of case A huge flying machine measuring 60 x 64 m and weighing 300 tons disappears without a trace in the gloom of the Malayan night The search for six years is still fruitless and there is not even a fixed location for a possible catastrophe And it would seem that it was all happening in a world where satellites and sensors are able to hear a mouse sneeze from thousands of kilometers away and despite all this the waters of the Indian Ocean or any other sea were forever closed over MH 370 After all we do not even know where the plane flew after the pilots turned off its transponder One can only make assumptions and hypotheses It is incomprehensible for us maybe all this happened in an area bristling with radar stations and other air traffic detection devices And nobody has seen anything nobody knows anything Hundreds of ships pass daily in waters with increased sea traffic And yet no one knows what happened We wanted to present the reader with the development of the situation and new searches and new hopes for finding missing people and the airplane Some are factual some are quite fantastic
