Micro Cap Stocks Tony Pow, 2014-10-08 I enjoy micro caps stocks between 50M to 300M according to SEC more than penny stocks as they're less risky When they're listed in one of the three major exchanges we have all the required filings of these companies We can use the same tools to track most other stocks However you may have a hard time to find articles on these stocks The potential of these stocks moving up to mid cap and even large cap could mean huge appreciation Eventually and hopefully they will be included in one of the major lists such as the S P 500 and this would boost up the stock prices automatically as some ETFs are required to buy them Updated 05 2015 Size 60 pages 6 9

Penny Stocks & Micro Cap Tony Pow, 2014-03-28 Today many big companies were used to be penny stocks and they moved up to micro caps and even to large caps Penny stocks are the most profitable but the riskiest while micro caps are less profitable but also less risky They are not followed by institution investors fund managers

pension managers insurance companies The small retail investors have a good chance to pick up gems However penny stocks are riskier due to a lot of frauds low volume and huge spread They are different from the popular IPOs of companies such as Facebook which are not available to retail investors before their IPOs However there are more companies that fit into our most profitable category than the handful of big IPOs we have every year I further classify this category into 1 Penny stocks They are stocks with prices less than 5 with many exceptions and are not listed in the three major stock exchanges for my own definition They have less requirements usually only financial statements This book usually ignores stocks less than 1 as they are far too risky However buy them if you fully understand the companies The majority of them described in this book are traded in OTCBB OTC bulletin board and OTCQX OTC Markets Group In addition many others are listed in local exchanges in both the US and foreign countries Some penny stocks are also named as pink sheets with symbol names ending with PK They are riskier as the filing requirements are almost none The inter listed pink sheets in their own countries such as Canada and Japan could be high quality and some provide the same information as our large caps 2 Micro caps Stocks with prices ranging from 1 to 20 a market cap between 25 and 300 million and its majority are listed in the three major exchanges This is my definition and it may vary with others Some stocks are in the gray area I bought ALU at 1 and had a market cap of 1 B then I still consider it a micro cap stock for my purpose as a turnaround candidate First practice market timing When the market is plunging do not buy any stock as most stocks fall In the early recovery a phase defined by me in the market cycle in Chapter 4 most stocks rise especially the beaten valued stocks and the candidates to be acquired by larger companies The strategy Buy and Hold is dead since 2000 Check out the Power of Market Timing in Section I There are thousands of stocks about 30 000 if including smaller and foreign exchanges How can you find the winners Use one of the simple screens that are available to you free from many web sites such as the one from your broker to find a handful of stocks The filter criteria could be P E 25 and
