

**Strategy 1: The Number Line**

After students have studied pages 1 and 2, ask students to work in pairs to create a number line graphing the given division problems. Once students have an understanding of how to label points, assign students to determine and graph the following division problems on the number line.

The same problem was presented a third time with the use of a number line below the number line for students to complete. This is an opportunity to give students an opportunity to apply their skills to a new problem.

Page 2:**Problem Set: Number Line Graphing Division Problems**

Each student has a number line graph on page 1. Students will represent each problem on their own number line. Before asking to find number line answers, demonstrate how to label the number line with the given division problem. Then students will find the answer to each problem on their number line. If you have a number line graph on page 1, you can use it to help you find the answer to each problem.

1. The number line below graphed the problem $10 \div 2$. Complete the table.

**Problem Set:****Number Line Graphing**

Problem	Number Line	Number Line	Number Line
10 ÷ 2	0		
10 ÷ 2	1		
10 ÷ 2	2		
10 ÷ 2	3
