**The Ultimate DIY Guide to Building Motorcycles** Simon Phil M D,2022-02-24

From the dawn of the motor vehicle to the modern day, the motorcycle has been a part of our lives. It has been a symbol of freedom, a means of transport, and a way of life. The first commercial motorcycle was built by Edward Butler in Great Britain in 1884. It employed a horizontal single cylinder engine mounted between two steerable front wheels and a drive shaft connected to the rear wheel. By 1900 many manufacturers were producing pedal cycles as well as motorcycles, adding more centrally mounted engines. This led to a rapid increase in the number of motorcycles and a competition between manufacturers. The Tourist Trophy races were held in the Isle of Man in 1907 as the first of many. Since then the proving ground for many new designs has been the Isle of Man, where supercharged multi-cylinder engines mounted on aerodynamic frames have been developed. In this simple DIY guide you will learn the basics of constructing a motorcycle and how to reconstruct one the way you want. You will also find out what you need to ensure your bike is perfect the way you want it after reading this book you will see how easy it is to build a motorcycle from the scratch. So enjoy and read on.
