- 1 Create physician flow
- 2 Support physician value added time
- 3 Visually communicate patient status
- 4 Standardize everyone s work
- 5 Lay out the clinic for minimal motion
- 6 Change the care delivery model

Why go through such a transformation Because it works Tell a doctor that he can see the same number of patients offering the same high quality and personal care and have an extra 90 minutes at the end of his clinic day and that means something Tell the staff that they can look forward to actually ending on time with satisfied patients no backlog and having focused their attention completely on quality patient care and they will listen These Lean principles and success steps work in clinics ranging from orthopedics to neurology to cardiac care the specialty doesn t matter They work in small practices and large hospital settings Lean methodology provides the tools to address the frustrations patients and doctors alike experience in the clinic process Included throughout the book is a case study showing the lean transformation undertaken at the Orthopedic Center at Children s Hospital of Wisconsin with numerous quotes and insights from those actually involved This transformation resulted in patient wait times being reduced by more than 70 percent the clinic being able to see 25 percent more patients in less space patient satisfaction scores sometimes reaching 100 percent and staff satisfaction scores improving by more than 25 percent

Pauley, 2012-01-01 The purpose of this book is to provide a road map to help healthcare professionals establish a culture of patient safety in their facilities and practices provide high quality healthcare and increase patient and staff satisfaction by improving communication among staff members and between medical staff and patients It achieves this by describing what each of six types of people will do in distress by providing strategies that will allow healthcare professionals to deal more effectively with staff members and patients in distress and by showing healthcare professionals how to keep themselves out of distress by getting their motivational needs met positively every day The concepts described in this book are scientifically based and have withstood more than 40 years of scrutiny and scientific inquiry They were first used as a clinical model to help patients help themselves and indeed are still used clinically The originator of the concepts Dr Taibi Kahler is an internationally recognized clinical psychologist who was awarded the 1977 Eric Berne Memorial Scientific Award for the clinical application of a discovery he made in 1971 That discovery enabled clinicians to shorten significantly the treatment time of patients by reducing their resistance as a result of miscommunication between their doctors and themselves
