

The H4-750 can receive two channels simultaneously. One is set to 151.4 MHz to receive international NAVTEX messages and another is selectable from 400 to 4200.1 kHz for domestic or local VHF-FM messages. These messages include a variety of safety information such as navigational warnings, Meteorological Warnings, Search and Rescue (SAR) information and other information for ships sailing within the reach of each service station's coverage. The broadcast station can be selected automatically according to own ship position when the H4-750 is connected with a GPS receiver.

The ROL 750-A consists of a receiver, display with printer and antenna units. The ROL 750-B has a line profile, display without a printer, receiver and antenna units. The compact unitless type antenna requires no grounding because it is a loop antenna. In addition, the antenna incorporates a high-performance preamp within the compact body, which gives reliable and unobscured reception without an extra antenna.
