the International Space Station,2000-04-23 The International Space Station ISS is truly an international undertaking The  
project is being led by the United States with the participation of Japan the European Space Agency Canada Italy Russia and  
Brazil Russia is participating in full partnership with the United States in the fabrication of ISS modules the assembly of ISS  
elements on orbit and after assembly has been completed the day to day operation of the station Construction of the ISS  
began with the launch of the Russian Zarya module in November 1998 followed by the launch of the U S Unity module in  
December 1998 The two modules were mated and interconnected by the crew of the Space Shuttle during the December  
flight and the first assembled element of the ISS was in place Construction will continue with the delivery of components and  
assembly on orbit through a series of 46 planned flights During the study period the Assembly Complete milestone was  
scheduled for November 2004 with the final ISS construction flight delivering the U S Habitation Module Engineering  
Challenges to the Long Term Operation of the International Space Station is a study of the engineering challenges posed by  
longterm operation of the ISS This report states that the National Aeronautics and Space Administration NASA and the ISS  
developers have focused almost totally on completing the design and development of the station and completing its assembly  
in orbit This report addresses the issues and opportunities related to long term operations      **Electronic Musician** ,2001
