Journal History Of Islamic Medicine:

Encyclopaedia of the History of Science, Technology, and Medicine in Non-Western Cultures Helaine Selin, 2008-03-12 Here at last is the massively updated and augmented second edition of this landmark encyclopedia. It contains approximately 1000 entries dealing in depth with the history of the scientific, technological, and medical accomplishments of cultures outside of the United States and Europe. The entries consist of fully updated articles together with hundreds of entirely new topics. This unique reference work includes intercultural articles on broad topics such as mathematics and astronomy as well as thoughtful philosophical articles on concepts and ideas related to the study of non-Western science such as rationality, objectivity, and method. You'll also find material on religion and science, East and West, and magic and science. Journal of Indian History, 1926 The Oxford Handbook of the History of Psychology: Global Perspectives David B. Baker, 2012 The science and practice of psychology has evolved around the world on different trajectories and timelines, yet with a convergence on the recognition of the need for a human science that can confront the challenges facing the world today. Few would argue that the standard narrative of the history of psychology has emphasized European and American traditions over others, but in today's global culture, there is a greater need in psychology for international understanding. This volume describes the historical development of psychology in countries throughout the world. Contributors provide narratives that examine the political and socioeconomic forces that have shaped their nations' psychologies. Each unique story adds another element to our understanding of the history of psychology. The chapters in this volume remind us that there are unique contexts and circumstances that influence the ways in which the science and practice of psychology are assimilated into our daily lives. Making these contexts and circumstances explicit through historical research and writing provides some promise of greater international insight as well as a better understanding of the human condition. Arabs in Treatment: Yana Korobko, 2016-08-19 When I was only starting the therapeutic work with the Middle Eastern patients, I was looking for some kind of guidance to enable my genuine understanding of the Muslim patient cases. However, the material was scarce, haphazardly scattered, and mostly referring to the traditional therapies. That was not helpful and was even more confusing. With time, I managed to amass my own systemized data based on regular observations, practical cases, reflections, and exchanges with the colleagues. This material helped me to approach each case individually while respecting the cultural environment of a patient. Eventually, the book was published. This is the kind of book that I have always wanted to find, and I had to write it eventually by myself. The work contains the systematized knowledge on the evolution of scientific psychology in the Islamic world, which starts with the prophetic times and continues until now. The book reveals the signifiers which form a structure of a Muslim psyche. It also exposes the recurrent mental health complaints of the Arab patients and investigates their unconscious roots. The book is intended first of all for professionals who are directly related to the Muslim mental health care system. Secondly, it is for anyone who is considering undergoing a personal

analysis And certainly the edition is for everyone interested in the subject This book does not intend to bring the answers It rather continues the dialogue regarding the necessity of creating the psychological counseling culture in the Muslim world

Islamophobia Stephen Sheehi, 2010-12-03 Islamophobia The Ideological Campaign Against Muslims examines the rise of anti Muslim and anti Arab sentiments in the West following the end of the Cold War through GW Bush s War on Terror to the Age of Obama Using Operation Desert Storm as a watershed moment Stephen Sheehi examines the increased mainstreaming of Muslim bating rhetoric and explicitly racist legislation police surveillance witch trials and discriminatory policies towards Muslims in North America and abroad The book focuses on the various genres and modalities of Islamophobia from the works of rogue academics to the commentary by mainstream journalists to campaigns by political hacks and special interest groups Some featured Islamophobes are Bernard Lewis Fareed Zakaria Thomas Friedman David Horowitz Ayaan Hirsi Ali Irshad Manji George W Bush Dick Cheney John McCain Hilary Clinton and Barack Obama Their theories and opinions operate on an assumption that Muslims particularly Arab Muslims suffer from particular cultural lacuna that prevent their cultures from progress democracy and human rights While the assertion originated in the colonial era Sheehi demonstrates that it was refurbished as a viable explanation for Muslim resistance to economic and cultural globalization during the Clinton era Moreover the theory was honed into the empirical basis for an interventionist foreign policy and propaganda campaign during the Bush regime and continues to underlie Barack Obama s new internationalism If the assertions of media pundits and rogue academics became the basis for White House foreign policy Sheehi also demonstrates how they were translated into a sustained domestic policy of racial profiling and Muslim baiting by agencies from Homeland Security to the Department of Justice Furthermore Sheehi examines the collusion between non governmental agencies activist groups and lobbies and local state and federal agencies to in suppressing political speech on US campuses critical of racial profiling US foreign policy in the Middle East and Israel While much of the direct violence against Muslims on American streets shops and campuses has subsided Islamophobia runs throughout the Obama administration Sheehi therefore concludes that Muslim and Arab hating emanate from all corners of the American political and cultural spectrum serving poignant ideological functions

Medieval Islamic Civilization Josef W. Meri, 2006 Examines the socio cultural history of the regions where Islam took hold between the 7th and 16th century This two volume work contains 700 alphabetically arranged entries and provides a portrait of Islamic civilization It is of use in understanding the roots of Islamic society as well to explore the culture of medieval civilization

Indian Journal of History of Science ,2000 **History of Psychiatry and Medical Psychology** Edwin R. Wallace, John Gach, 2010-04-13 Most of the prefatory issues are extensively elaborated upon in the Prolegomenon which also contains the complete references to the texts and authors discussed below Nevertheless the Preface would be grossly incomplete without touching on some of these issues books and scholars Too many of this book s chapters e g Mora s Marx s D B Weiner s examine and reference important earlier as well as contemporary general histories

of psychiatry and specialized monographs in German French Italian and Spanish Also in his 1968 Short History of Psychiatry discussed below Ackerknecht pp xi xii references important nineteenth and earlier twentieth century psychiatric histories in English French and German Such citations will of course not be repeated here Finally thanks to several publishers re editions of dozens of classical psychiatric texts one can consult their bibliographies as well See Prolegomenon for references to these splendid series In a rough and ready sense medical history began in classical Greece for example On Ancient Medicine While traditionally included in the Hippocratic corpus this text seems more likely to have been written by a non or even anti Hippocratic doctor Moreover the Hippocratic and other schools were hardly as secular as we now suppose On Epilepsy for example does not so much declare the prevalent denotation of it as the sacred disease erroneous as it does that it is no more nor less sacred than any other disease
