 Gaudioso, 2015-12-01 Over the past two decades bioscience facilities worldwide have experienced multiple safety and  
 security incidents including many notable incidents at so called sophisticated facilities in North America and Western Europe  
 This demonstrates that a system based solely on biosafety levels and security regulations may not be sufficient Setting the  
 stage for a substantively different approach for managing the risks of working with biological agents in laboratories  
 Laboratory Biorisk Management Biosafety and Biosecurity introduces the concept of biorisk management a new paradigm  
 that encompasses both laboratory biosafety and biosecurity The book also provides laboratory managers and directors with  
 the information and technical tools needed for its implementation The basis for this new paradigm is a three pronged multi  
 disciplinary model of assessment mitigation and performance the AMP model The application of the methodologies criteria  
 and guidance outlined in the book helps to reduce the risk of laboratories becoming the sources of infectious disease  
 outbreaks This is a valuable resource for those seeking to embrace and implement biorisk management systems in their

facilities and operations including the biological research clinical diagnostic and production manufacturing communities
