Ancient Geopolymers in South America and Easter Island Joseph Davidovits, 2024-11-16 This book presents the study on Ancient Geopolymers in South America and Easter Island regions exploring the artificial nature of the volcanic rocks used in the construction of Easter Island's statues Contrary to the belief that the statues were carved and transported Davidovits suggests they were made on site using geopolymer technology He proposes that this knowledge came from Amerindians from the Andes specifically the Tiahuanaco region near Lake Titicaca The book is divided into two parts the first examines geopolymeric artificial stone technologies in the Andes and the second establishes a connection between these technologies and Easter Island 3 700 km away Davidovits research includes geological expeditions SEM analysis petrography and a comprehensive review of international literature It is intriguing to observe that in both cases Pumapunku Tiwanaku in the Andes and Easter Island volcanic rocks are involved which contain biological carbon These discoveries undeniably support the theory of geopolymeric artificial manufacturing challenging traditional archaeological views *Geopolymers: The route to eliminate waste and emissions in ceramic and cement manufacturing* ICe rS, 2015-07-29 This book compiles the contributions presented at the First ECI Conference on Geopolymers The route to eliminate waste and emissions in ceramic
