**The Rebirth of Education** Lant Pritchett, 2013-10-14 Despite great progress around the world in getting more kids into schools too many leave without even the most basic skills In India s rural Andhra Pradesh for instance only about one in twenty children in fifth grade can perform basic arithmetic The problem is that schooling is not the same as learning In The Rebirth of Education Lant Pritchett uses two metaphors from nature to explain why The first draws on Ori Brafman and Rod Beckstrom s book about the difference between centralized and decentralized organizations The Starfish and the Spider Schools systems tend be centralized and suffer from the limitations inherent in top down designs The second metaphor is the concept of isomorphic mimicry Pritchett argues that many developing countries superficially imitate systems that were successful in other nations much as a nonpoisonous snake mimics the look of a poisonous one Pritchett argues that the solution is to allow functional systems to evolve locally out of an environment pressured for success Such an ecosystem needs to be open to variety and experimentation locally operated and flexibly financed The only main cost is ceding control the reward would be the rebirth of education suited for today s world      Insights into the New Hydrogen Economy William J. Nuttall, Joseph B. Powell, Karim L. Anaya-Stucchi, Adetokunboh T. Bakenne, Andy Wilson, 2024-10-31 This open access book offers a comprehensive exploration of the future of the hydrogen industry It builds upon insights gathered from a series of expert workshops and follow on activity International experts from various fields including industry public policy and academia engaged in dialogue and knowledge exchange resulting in invaluable findings and observations This book builds upon that process to offers an in depth analysis of the key issues facing commercial hydrogen energy development in the late

2020s It highlights how hydrogen has the potential to emerge as a major component of the global energy industry aiding the decarbonization process Among the important lessons learned the book discusses how both hydrogen and electrification will both play a significant role in the energy sector but hydrogen could emerge as the larger energy carrier and the two developments will largely operate independently of each other The book also highlights the significance of industrial infrastructure such as ports pipelines hubs and clusters in scaling up hydrogen use Finally the book considers the importance of hydrogen purity for future applications and acknowledges the potential for geologically sourced hydrogen to be a vital component of supply in the future
