Migration In World History:

Migration Michael H. Fisher, 2013-11-04 Migration began with our origin as the human species and continues today. Each chapter of world history features distinct types of migration. The earliest migrations spread humans across the globe. Over the centuries as our cultures, societies, and technologies evolved in different material environments, migrants conflicted, merged, and cohabited with each other, creating, entering, and leaving various city states, kingdoms, empires, and nations. During the early modern period, migrations reconnected the continents including through colonization and forced migrations of subject peoples while political concepts like citizen and alien developed. In recent history, migrations changed their character as nation states and transnational unions sought in new ways to control the peoples who migrated across their borders. This volume will explore the process of migration chronologically and also at several levels from the illuminating example of the migration of a individual community to larger patterns of the collective movements of major ethnic groups to the more abstract study of the processes of emigration, migration, and immigration. This book will concentrate on substantial migrations covering long distances and involving large numbers of people. It will intentionally balance evidence from the now diverse peoples of the world for example by highlighting an exemplary migration for each of the six chapters that highlights different trajectories and by keeping issues of gender and socio-economic class salient wherever appropriate. Further as a major theme, the volume will consider how technology, the environment, and various polities have historically shaped human migration. Exciting new scholarship in the several fields inherent in this topic make it a particularly valuable and timely project.

Migration in World History Patrick Manning, Tiffany Trimmer, 2013 This book traces the connections among regions brought about by the movement of people, diseases, crops, technology, and ideas. Drawing on examples from a wide range of geographical regions and thematic areas noted, world historian Patrick Manning guides the reader through the earliest human migrations including the earliest hominids, their development and spread, and the controversy surrounding the rise of homo sapiens, the rise and spread of major language groups, an examination of civilizations, farmers, and pastoralists from 3000 BCE to 500 CE, trade patterns including the early Silk Road and maritime trade in the Mediterranean and more.

Migration in World History, 2004 *Migration History in World History*, 2010-03-25 Migration is the talk of the town. On the whole, however, the current situation is seen as resulting from unique political upheavals. Such a historical interpretation ignores the fact that migration is a fundamental phenomenon in human societies from the beginning and plays a crucial role in the cultural, economic, political, and social developments and innovations. So far, however, most studies are limited to the last four centuries, largely ignoring the spectacular advances made in other disciplines which study the deep past like anthropology, archaeology, population genetics, and linguistics and that reach back as far as 80,000 years ago. This is the first book that offers an overview of the state of the art in these disciplines and shows how historians and social scientists working in the recent past can profit from their insights.
