Miller And Levine Biology Chapter 16:

The Big Argument John Ashton, Michael Westacott, 2006-01-01 The argument that reads like a conversation about life Is there archaeological evidence for the New Testament Did the universe hatch from a cosmic egg What does the fossil record imply about the existence of God Is design inferred by the existence of information Since the Enlightenment spirited debates about the existence of God have captured the public's imagination Scholars philosophers and scientists have grappled with the evidence that God exists or doesn't Today some of the world's best minds in a variety of disciplines grapple with whether there is any real purpose to our lives Yet not only do many scientists believe in the God who created us with purpose they also understand that what we do in the here and now has consequences in the next life John Ashton has compiled a group of essayists who specialize in fields such as archaeology astronomy biblical scholarship and more The result is a fascinating exploration of an age old question sure to intrigue believers and skeptics alike
