Military Skills Development System 2016:

South Africa's Post-Apartheid Military Lindy Heineken, 2020-01-01 This timely book examines how the South African National Defence Force has adapted to the country's new security political and social environment since 1994. In South Africa's changed political state, how has civilian control of the military been implemented and what does this mean for defence in a democracy? This book presents an overview of the security environment, how the mission focus of the military has changed and the implications for force procurement, force preparation, force employment and force sustainability. The author addresses other issues such as the effect of integrating former revolutionary soldiers into a professional armed force, the effect of affirmative action on meritocracy, recruitment and retention, military veterans looking at the difficulties they face in reintegrating back into society and finding gainful employment, gender equality and mainstreaming the rise of military unions and why a confrontational instead of a more corporatist approach to labour relations has emerged. HIV/AIDS and the consequences this holds for the military in terms of its operational effectiveness. In closing, the author highlights key events that have caused the SANDF to become lost in transition and transformation, spelling out some lessons learned. The conclusions she draws are pertinent for the future of defence security and civil-military relations of countries around the world. Annual Report South Africa. Department of Defence, 2016

Parent-Child Separation Jennifer E. Glick, Valarie King, Susan M. McHale, 2021-11-26 This book examines the similarities in children's short and long-term development and adjustment when they have been separated from their parents because of larger institutional forces. It addresses the unique circumstances and the similarities faced by parents and children under three different institutional contexts of separation: parental migration and deportation, parental incarceration and parental military deployment. Chapters describe the difficulties faced by families in each of these circumstances along with the challenges in conducting research under the multidimensional and dynamic complexities of parent-child separation. Finally, the volume offers recommendations for creating supportive structures and interventions for families facing separation that can bolster youth well-being in childhood and beyond. Featured areas of coverage include Parental migration, Parental incarceration, Parental military deployment, Undocumented migration and deportation, Child-parent relationship and child resilience and adjustment. **Parent-Child Separation** is a must-have resource for researchers, professors, clinicians, professionals and graduate students in developmental psychology, family studies, public health, clinical social work, educational policy and migration studies, as well as all interrelated disciplines including sociology, criminology, demography, prevention science, political science and economics.

African Peace Militaries David Francis, 2017-08-16 This book provides a critical understanding of the emerging role of African militaries in peacetime democratic Africa. This book departs from the dominant perspective which simply presents the military as an enemy of democracy because of the history and legacy of unending military coups and interventions in civilian politics. In the context of Africa, the military has been blamed or largely held responsible for instigating wars, armed

conflicts political violence poverty and underdevelopment due to bad governance and mismanagement of the state Drawing from diverse case studies across Africa including Nigeria Rwanda Uganda Ethiopia and Egypt this volume presents the argument that though the military has played a negative and sometimes destructive role in undermining constitutional rule and the overthrow of democratic civilian governments the same military now operating in a changed global environment is making effort to support the development of democracy and democratic consolidation as well as remain subjected to civilian democratic oversight and control Notwithstanding the real challenge for this emerging trend of African peace militaries is the extent to which they are able to fulfil on a predictable and consistent basis their constitutional mandate to defend the people against elected autocrats in Africa who try to use the military to perpetuate themselves in power This work fills a critical gap in the literature and will be of much interest to students of African security and politics peace and conflict studies security studies and IR in general
