Atheism is Winning! Anonymous, 2014-04-08 We live in a world of radical hypocrisy Priests Terrorists and Christian Evangelists use iPhones access satellite Networks drive automobiles and seem to exist in some kind of imaginary bubble untouched by reality How is this possible How can such a large number of people both demand modern technology while still refusing to listen to the very people who brought it to them In an age of motor cars electric light bulbs and rockets to the moon more than half the world still insists on keeping their faith in God even while the most rational minds are calling this behavior dangerous archaic and possibly insane Perhaps this is something we should talk about But is anyone listening Perhaps I should say it louder Book features a variety of essays both humorous and serious on the issues of Atheism Marketing Hypocrisy Seduction Religion Psychology of Belief New Atheism Failures of Buddhism The Templeton Prize Beyond Sartre's Reef of Solipsism and other mildly poetic thoughts

[Atheism, Fundamentalism and the Protestant Reformation](#) Liam Jerrold Fraser, 2018-07-19 In this study of new atheism and religious fundamentalism this book advances two provocative and surprising arguments Liam Jerrold Fraser argues that atheism and Protestant fundamentalism in Britain and America share a common historical origin in the English Reformation and the crisis of authority inaugurated by the Reformers This common origin generated two presuppositions crucial for both movements a literalist understanding of scripture and a disruptive understanding of divine activity in nature Through an analysis of contemporary new atheist and Protestant fundamentalist texts Fraser shows that these presuppositions continue to structure both groups and support a range of shared biblical scientific and theological beliefs Their common historical and intellectual structure ensures that new atheism and Protestant fundamentalism while on the surface irreconcilably opposed share a

secret sympathy with one another yet one which leaves them unstable inconsistent and unsustainable

The Secular Paradox Joseph Blankholm, 2022-06-07 Choice Outstanding Academic Title 2023 A radically new way of understanding secularism which explains why being secular can seem so strangely religious For much of America's rapidly growing secular population religion is an inescapable source of skepticism and discomfort It shows up in politics and in holidays but also in common events like weddings and funerals In *The Secular Paradox* Joseph Blankholm argues that despite their desire to avoid religion nonbelievers often seem religious because Christianity influences the culture around them so deeply Relying on several years of ethnographic research among secular activists and organized nonbelievers in the United States the volume explores how very secular people are ambivalent toward belief community ritual conversion and tradition As they try to embrace what they share secular people encounter again and again that they are becoming too religious And as they reject religion they feel they have lost too much Trying to strike the right balance secular people alternate between the two sides of their ambiguous condition absolutely not religious and part of a religion like secular tradition Blankholm relies heavily on the voices of women and people of color to understand what it means to live

with the secular paradox The struggles of secular misfits the people who mis fit normative secularism in the United States show that becoming secular means rejecting parts of life that resemble Christianity and embracing a European tradition that emphasizes reason and avoids emotion Women people of color and secular people who have left non Christian religions work against the limits and contradictions of secularism to create new ways of being secular that are transforming the American religious landscape They are pioneering the most interesting and important forms of secular religiosity in America today

Unapologetic John W. Loftus,2016-11-01 A forceful takedown of faith based reasoning in secular institutions Just as intelligent design is not a legitimate branch of biology in public educational institutions nor should the philosophy of religion be a legitimate branch of philosophy argues acclaimed author John W Loftus In his call for ending the philosophy of religion he argues that as it is presently being practiced the main reason the discipline exists is to serve the faith claims of Christianity Most of philosophy of religion has become little more than an effort to defend and rationalize preexisting Christian beliefs By highlighting the stark differences between faith based reasoning and evidence based reasoning Loftus presents vital arguments and lessons about the importance of critical thinking not only in all aspects of study but also in life His conclusions and recommendations thus resonate far beyond the ivory towers and ivy covered walls of academic institutions For atheists secular individuals and those interested in critical thinking about religion **Manual of the**
