theme of the book is that understanding how research results translate into market innovation and implementation especially understanding the nature of revolutionary innovation is as important as the creation of innovations themselves While the focus of the book is on Transportation the concepts and recommendations presented apply to other fields too **Social Science Abstracts** ,1933 *Urbanization and Development* ,2016 The analysis of urban development of the past twenty years presented in this maiden edition of the World Cities Report shows with compelling evidence that there are new forms of collaboration and cooperation planning governance finance and learning that can sustain positive change The Report unequivocally demonstrates that the current urbanization model is unsustainable in many respects It conveys a clear message that the pattern of urbanization needs to change in order to better respond to the challenges of our time to address issues such as inequality climate change informality insecurity and the unsustainable forms of urban expansion
