**Africa's Lions** Haroon Bhorat, Finn Tarp, 2016-11-08 Examining the economic forces that will shape Africa's future Africa's Lions examines the economic growth experiences of six fast growing and or economically dominant African countries Expert African researchers offer unique perspectives into the challenges and issues in Ethiopia Ghana Kenya Mozambique Nigeria and South Africa Despite a growing body of research on African economies very little has focused on the relationship between economic growth and employment outcomes at the detailed country level A lack of empirical data has deprived policymakers of a robust evidence base on which to make informed decisions By harnessing country level household firm and national accounts data together with existing analytical country research the authors have attempted to bridge this gap The growth of the global working age population to 2030 will be driven primarily by Africa which means that the relationship between growth and employment should be understood within the context of each country's projected demographic challenge and the associated implications for employment growth A better understanding of the structure of each country's workforce and the resulting implications for human capital development the vulnerably employed and the working poor will be critical to informing the development policy agenda As a group the six countries profiled in Africa's Lions will largely shape the continent's future Each country chapter focuses on the complex interactions between economic growth and employment outcomes within the individual Africa's Lions context

**Food Education and Rural Resilience in Japan** Stephanie Assmann, 2025-10-01 Food education initiatives exist worldwide but Japan remains unique with its food education law known as shokuiku The country's impressive health metrics high life expectancies low obesity and affordable health care often lead observers to praise this approach This book presents a more nuanced analysis First it challenges the assumption that food education is wholly a good thing by exposing underlying power mechanisms Through food diagrams food fairs and school lunch programs government ministries promote both nationalism and traditional gender roles Second it explores how food education operates in Japan's rural regions where educators champion resilience and food self sufficiency to alleviate depopulation and economic decline This emphasis on local food persisted even in the aftermath of the 2011 Fukushima nuclear disaster Using Foucault's concept of governmentality historical contextualization and extensive fieldwork in rural Japan this study reveals the complex political agenda driving food education in a non Western society
