Randomized Control Trials in the Field of Development Florent Bédécarrats, Isabelle Guérin, François

Roubaud, 2020-09-17 This is an open access title available under the terms of a CC BY NC ND 4.0 International licence. It is free to read at Oxford Academic and offered as a free PDF download from OUP and selected open access locations. In October 2019, Abhijit Banerjee, Esther Duflo, and Michael Kremer jointly won the 51st Sveriges Riksbank Prize in Economic Sciences in Memory of Alfred Nobel for their experimental approach to alleviating global poverty. But what is the exact scope of their experimental method known as randomized control trials (RCTs)? Which sorts of questions are RCTs able to address and which do they fail to answer? The first of its kind, *Randomized Control Trials in the Field of Development: A Critical Perspective* provides answers to these questions, explaining how RCTs work, what they can achieve, why they sometimes fail, how they can be improved, and why other methods are both useful and necessary. Bringing together leading specialists in the field from a range of backgrounds and disciplines—economics, econometrics, mathematics, statistics, political economy, socioeconomics, anthropology, philosophy, global health, epidemiology, and medicine—it presents a full and coherent picture of the main strengths and weaknesses of RCTs in the field of development. Looking beyond the epistemological, political, and ethical differences underlying many of the disagreements surrounding RCTs, it explores the implementation of RCTs on the ground, outside of their ideal theoretical conditions, and reveals some unsuspected uses and effects, their disruptive potential, but also their political uses. The contributions uncover the implicit worldview that many RCTs draw on and disseminate and probe the gap between the method's narrow scope and its success, while also proposing improvements and alternatives. Without disputing the contribution of RCTs to scientific knowledge, *Randomized Control Trials in the Field of Development* warns against the potential dangers of their excessive use, arguing that the best use for RCTs is not necessarily that which immediately springs to mind. Written in plain language, this book offers experts and laypeople alike a unique opportunity to come to an informed and reasoned judgement on RCTs and what they can bring to development. *An Almost*

Insurmountable Evil Mike McCormick, 2025-02-11 Questioning Pope Francis: You are not alone. Catholics around the world are puzzled by a pope who has defiled the Church of Jesus Christ with his overt politics. Questioning Joe Biden: You are not alone. His toxic presidency and destructive relationship with Barack Obama ended in an old man's whimper. Or was there more to it? Mike McCormick answers your questions with the truth. An almost insurmountable evil was done by an illegitimate pope, an unclean cardinal, a compromised president, his criminal vice president, and their win at all costs. Operatives based on McCormick's experience as Joe Biden's White House Press Office stenographer, this eyewitness account details the globalist plots perpetrated by Cardinal Theodore McCarrick, Pope Francis, the CIA, President Barack Obama, Vice President Joe Biden, Hunter Biden, Denis McDonough, Anthony Fauci, and many others. McCormick reveals how the Obama-Biden White House networked the Catholic Church into human trafficking along the Southern Border, how it schemed Ukraine into becoming a

biological warfare threat to Russia and how it collaborated with China to release the Wuhan Pandemic to upend President Trump's 2020 campaign. In this point-by-point dissection of Obama-Biden Deep State overreach and of what Archbishop Vigano refers to as the Deep Church and of what Robert F. Kennedy Jr. refers to as Deep Health, readers will understand the betrayal, death, economic destruction, and emotional damage perpetrated on them by their governments, the Catholic Church, and the globalist elites they serve. *Scientific and Technical Aerospace Reports*, 1991.
