Life-Span Human Development Elizabeth A. Sigelman,1994-08 **Human Development** Robert V. Kail,John C. Cavanaugh,1996 Kail and Cavanaugh tell the story of the life span in a narrative that is intuitive and holistic eliminating the redundancy of describing the life span via the traditional 5 x 3 of similar organizational structure used by many texts for the course The book s four part structure reflects early childhood the school years the working raising children years and later life a structure that makes sense to students and more accurately depicts the

developmental process The author's four part structure reflects the emerging view in several disciplines that development needs to be viewed in larger segments to reflect both the reality of large individual differences not all five year olds are the same and the linkages across the life span of such domains as memory language perception etc To reflect these issues the text includes age specific chapters where essential prenatal development adolescence entering adulthood middle age later life and more topical chapter where appropriate to reflect the continuity of development entering the social world the school years relationships work in adulthood and dying and bereavement **Development Across the Life Span** Robert Stephen Feldman, 2003 This comprehensive and integrated text provides students with a broad overview of the field of human development covering the entire range of human life from the moment of conception through death and focusing on physical cognitive and social and personality development It covers basic theories and research findings as well as highlighting current applications outside the laboratory **Canadian Psychology**, 2006
