 Loftus, 2018-06-21 For courses in Java programming Java Software Solutions establishes a strong foundation of programming
 techniques to foster well designed object oriented software Heralded for its integration of small and large real world
 examples the worldwide best selling text emphasises problem solving and design skills and introduces students to the
 process of constructing high quality software systems The 9th Edition features a sweeping overhaul of Graphics Track
 coverage to fully embrace the JavaFX API This fresh approach enriches programmers understandings of core object oriented
 principles The text uses a natural progression of concepts focusing on the use of objects before teaching how to write them
 equipping students with the knowledge and skill they need to design true object oriented solutions The full text downloaded

 to this eBook Time limit The eBooks products do not have an expiry date You will continue to access your digital ebook
 products whilst you have your Bookshelf installed *"The" Athenaeum*, 1856 *Legal Protection for
 Computer-Implemented Inventions* Sabine Kruspig, Claudia Schwarz, 2016-04-24 As a result of the incorporation of computer
 software into countless commercial and industrial products the patentability of software has become a vital issue in
 intellectual property law This indispensable book provides an overview on the current status of computer implemented
 inventions in patent law across Europe and major jurisdictions worldwide A hugely practical field research tool with guidance
 based on case law it examines the major hurdles in each particular country and describes the best practice to be adopted
 Clearly showing how enforceable software patent applications can be competitively drafted and how a patent portfolio for
 computer implemented inventions can be established in several countries without spending money unnecessarily on
 problematic examination proceedings this book covers such issues and topics as the following claim categories for patent
 applications sufficient level of abstraction breadth of the claimed invention fundamental terms of computing and
 terminological traps probability for patents dependent on software application areas and patents in core areas of computing
 With separate chapters for the key countries Germany the United Kingdom France the United States China Korea Japan India
 and the European Patent Office the legal situation for computer implemented inventions in each country or region this book
 includes guidance on prosecution under national law analyses of relevant court decisions practice checklists and an outlook

on future developments The authors describe claim formulation based on actual cases and on principles of computer science in order to show what might be or might not be patentable in each jurisdiction With this incomparable resource patent attorneys and patent professionals in companies will get a basis for making decisions about the most appropriate jurisdictions in which to file patent applications This book will also be of great value to computer professionals who are affected by the protection of software or who are actively involved in the protection of software by patent law
