Lab Safety Manual Template

Introduction

Each Principal Investigator (PI) should develop and maintain a Lab Safety Manual for their laboratory. A lab safety manual: 1) contains safety information relevant to the laboratory's specific hazards and research materials, 2) serves as a training tool for lab personnel and should include documentation of such training, and 3) must be readily available to all research personnel in the lab.

A lab safety manual should include:

- Lab safety policies and Standard Operating Procedures (SOPs).
- Lab safety program key personnel
- Lab contact information
- Lab security procedures
- Hazard assessment information and Personal Protective Equipment (PPE) selection
- Lab emergency procedures
 - Spill response
 - Medical response
 - Lab- and building-specific evacuation information
- Descriptions of lab incidents, injuries, and corrective actions
- Safety training records for lab personnel
- Safety program correspondence

The lab safety manual should also include a Biosafety Manual for biological materials, a Chemical Hygiene Plan (CHP) for chemicals, a Radiation Permit for radioactive materials, and a Laser Safety Plan for Class 3b and 4 lasers.

Biosafety Manual – Laboratories operating at Biosafety Level 2 (BL-2) must dedicate a portion of the lab manual to Biosafety as per Biosafety in Microbiological and Biomedical Laboratories (BMBL) 5th Edition http://www.cdc.gov/od/ohs/biosfty/bmbl5/bmbl5toc.htm.

A Biosafety Manual should include:

- Lab-specific biosafety policies (e.g. hand-washing, food storage and eating, restricted access, daily surface decontamination, emergency spill and clean up procedures, use of PPE, etc.)
- Project-specific safety SOPs and copies of current Institutional Biosafety Committee (IBC) project registrations and approval letters
- DRS fact sheets on campus safety policies (e.g. Treatment and Disposal of Biological Materials, Handling and Disposal of Lab Sharps, etc.) which are available at: http://www.drs.illinois.edu/bss/factsheets/
- UIUC Exposure Control Plan (required only if working with human materials)
- Relevant sections of the BMBL (e.g. Sections I, II, & III pertaining to BL-1 and BL-2 practices; Appendix H pertaining to Working with Human and Other Primate Cells and Tissues, if applicable; Organism-specific information; etc.)
- Records/documentation of any required biosafety-related training (including reading and understanding Biosafety manual contents and lab policies)
