Complexity and Geographical Economics Pasquale Commendatore,Saime Kayam,Ingrid Kubin,2015-02-17 The uneven geographical distribution of economic activities is a huge challenge worldwide and also for the European Union In Krugman s New Economic Geography economic systems have a simple spatial structure This book shows that more sophisticated models should visualise the EU as an evolving trade network with a specific topology and different aggregation levels At the highest level economic geography models give a bird eye s view of spatial dynamics At a medium level institutions shape the economy and the structure of financial and labour markets At the lowest level individual decisions interact with the economic social and institutional environment the focus is on firms decision on location and innovation Such multilevel models exhibit complex dynamic patterns path dependence cumulative causation hysteresis on a network structure

and specific analytic tools are necessary for studying strategic interaction heterogeneity and nonlinearities Essays in Applied Labor Economics Darren Howard Lubotsky,2000 **Monthly Labor Review** ,1995 Publishes in depth articles on labor subjects current labor statistics information about current labor contracts and book reviews The Quarterly Review of Economics and Finance ,1997 Trafficked Children and Youth in the United States Elzbieta M. Gozdzia,2016-05-10

Trafficked children are portrayed by the media and even by child welfare specialists as hapless victims who are forced to migrate from a poor country to the United States where they serve as sex slaves But as Elzbieta M Gozdzia reveals in Trafficked Children in the United States the picture is far more complex Basing her observations on research with 140 children most of them girls from countries all over the globe Gozdzia debunks many myths and uncovers the realities of the captivity rescue and rehabilitation of trafficked children She shows for instance that none of the girls and boys portrayed in this book were kidnapped or physically forced to accompany their traffickers In many instances parents or smugglers paid by family members brought the girls to the U S Without exception the girls and boys in this study believed they were coming to the States to find employment and in some cases educational opportunities Following them from the time they were trafficked to their years as young adults Gozdzia gives the children a voice so they can offer their own perspective on rebuilding their lives getting jobs learning English developing friendships and finding love Gozdzia looks too at how the children s perspectives compare to the ideas of child welfare programs noting that the children focus on survival techniques while the institutions focus not helpfully on vulnerability and pathology Gozdzia concludes that the services provided by institutions are in effect a one size fits all trauma based model one that ignores the diversity of experience among trafficked children Breaking new ground Trafficked Children in the United States offers a fresh take on what matters most to these young people as they rebuild their lives in America Modern Labor Economics Ronald Gordon Ehrenberg,Robert Stewart Smith,1994 Providing a full survey of labour economics including current and classic research this new edition develops the theory of labour market behaviour summarizes empirical evidence that supports or contradicts each hypothesis and illustrates the usefulness of various theories for public policy **Aanwinsten van de Centrale Bibliotheek**
