

# Experiment 1.1 Names of Chemical Reactions

## Purpose:

The objectives of this laboratory experiment are to observe a variety of chemical reactions, to identify and explain observations with balanced chemical equations, and to classify each reaction as one of the four main types: synthesis, decomposition, single replacement, and double replacement/neutralization.

## Introduction:

In this laboratory experiment, you will perform five reactions of chemical reactions. Some have no observable change, others provide product and some chemical equations, suggest observations. Using indicators like visible appearance and odor tests that demonstrate properties and the classification of different types of reactions.
