

Nervous Tissue and Nerves

Objectives

- 1. Identify the various types of neurons and their functions.
- 2. Describe the structure and function of the nervous system.
- 3. Explain the role of the nervous system in the body.
- 4. Describe the structure and function of the brain.
- 5. Describe the structure and function of the spinal cord.
- 6. Describe the structure and function of the peripheral nervous system.
- 7. Describe the structure and function of the autonomic nervous system.
- 8. Describe the structure and function of the somatic nervous system.
- 9. Describe the structure and function of the sensory nervous system.
- 10. Describe the structure and function of the motor nervous system.

Purpose of the Exercise

To understand the structure and function of the nervous system and to identify the various types of neurons and their functions.

Learning Objectives

- 1. After completing this exercise, you should be able to:
 - Identify the various types of neurons and their functions.
 - Describe the structure and function of the nervous system.
 - Explain the role of the nervous system in the body.
 - Describe the structure and function of the brain.
 - Describe the structure and function of the spinal cord.
 - Describe the structure and function of the peripheral nervous system.
 - Describe the structure and function of the autonomic nervous system.
 - Describe the structure and function of the somatic nervous system.
 - Describe the structure and function of the sensory nervous system.
 - Describe the structure and function of the motor nervous system.

Nervous tissue is the body's control system. It is made up of neurons and glial cells. Neurons are the cells that carry out the body's commands. They are the cells that receive information from the environment and send it to the brain. They are the cells that control the body's movements. They are the cells that control the body's internal organs. They are the cells that control the body's temperature. They are the cells that control the body's heart rate. They are the cells that control the body's breathing. They are the cells that control the body's digestion. They are the cells that control the body's excretion. They are the cells that control the body's reproduction. They are the cells that control the body's growth. They are the cells that control the body's development. They are the cells that control the body's aging. They are the cells that control the body's death.

Objectives

Structure—Nervous Tissue and Nerves

1. Describe the structure and function of the nervous system.
2. Describe the structure and function of the brain.
3. Describe the structure and function of the spinal cord.
4. Describe the structure and function of the peripheral nervous system.
5. Describe the structure and function of the autonomic nervous system.
6. Describe the structure and function of the somatic nervous system.
7. Describe the structure and function of the sensory nervous system.
